Inspiring a Medico-Legal Revolution Pamela R. Ferguson, Graeme T.

Laurie, 2016-03-09 This book marks the retirement of Professor Sheila McLean whose contribution to the discipline of medical law has been truly ground breaking As one of the pioneers of the discipline Sheila McLean inspired a revolution in the ways in which lawyers doctors courts and patients perceive the relationship between medicine and the law The first International Bar Association Professor of Law and Ethics in Medicine she has worked tirelessly to champion the importance of law's role in regulating medicine and protecting patients rights The span in content of this book reflects the range of contributions that Professor McLean has herself made Her work gave direction and shape to a new field of study at a time when few questioned the authority of medicine or thought much about the plight of the patient This collection brings together 21 leading scholars in healthcare law and ethics to honour the depth and significance of her contribution Including authors from the US Australia Canada and New Zealand the contributions cover areas as diverse as start and end of life reproductive rights and termination of pregnancy autonomy of patients the protection of vulnerable patient groups and the challenges posed by new technologies

The Philosophy of Food David M. Kaplan, 2012-02-01

This book explores food from a philosophical perspective bringing together sixteen leading philosophers to consider the most basic questions about food What is it exactly What should we eat How do we know it is safe How should food be distributed What is good food David M Kaplan's erudite and informative introduction grounds the discussion showing how philosophers since Plato have taken up questions about food diet agriculture and animals However until recently few have considered food a standard subject for serious philosophical debate Each of the essays in this book brings in depth analysis to many contemporary debates in food studies Slow Food sustainability food safety and politics and addresses such issues as happy meat aquaculture veganism and table manners The result is an extraordinary resource that guides readers to think more clearly and responsibly about what we consume and how we provide for ourselves and illuminates the reasons why we act as we do

Immunitary Life Nik Brown, 2018-09-29 This book explores the growing intellectual interest in the politics of immunity It argues that taking an immunitary perspective is necessary if we are to better appreciate the body as a site of politics in the contemporary age It explores the dynamic tensions between community and immunity belonging and fragmentation the social and the individual It creates a dialogue between the social sciences humanities and biopolitical philosophy around immunity *Immunitary Life* empirically situates immunitary politics in real world debates This includes blood donation and evolving notions of embodied intimacy in the worlds of transplantation It examines changing ideas about infectivity bugs and the emergence of resistance in antibiotics The politics of vaccination offers a classic context for thinking about the ever changing relationships between the communal and the individual *Immunitary Life* is essential reading for contemporary scholarship in the sociology of the body and the political philosophy of biomedicine

CyberGenetics Anna Harris, Susan

Kelly, Sally Wyatt, 2016-04-28 Online genetic testing services are increasingly being offered to consumers who are becoming

exposed to and knowledgeable about new kinds of genetic technologies as the launch of a 23andme genetic testing product in the UK testifies Genetic research breakthroughs cheek swabbing forensic pathologists and celebrities discovering their ancestral roots are littered throughout the North American European and Australasian media landscapes Genetic testing is now capturing the attention and imagination of hundreds of thousands of people who can not only buy genetic tests online but can also go online to find relatives share their results with strangers sign up for personal DNA based musical scores and take part in research This book critically examines this market of direct to consumer DTC genetic testing from a social science perspective asking what happens when genetics goes online With a focus on genetic testing for disease the book is about the new social arrangements which emerge when a traditionally clinical practice genetic testing is taken into new spaces the internet It examines the intersections of new genetics and new media by drawing from three different fields internet studies the sociology of health and science and technology studies While there has been a surge of research activity concerning DTC genetic testing particularly in sociology ethics and law this is the first scholarly monograph on the topic and the first book which brings together the social study of genetics and the social study of digital technologies This book thus not only offers a new overview of this field but also offers a unique contribution by attending to the digital and by drawing upon empirical examples from our own research of DTC genetic testing websites using online methods and in depth interviews in the United Kingdom with people using healthcare services

Ethical futures: bioscience and food horizons

Kate Millar, Pru Hobson West, Brigitte Nerlich, 2023-09-04 In an ever changing interconnected world the agriculture and food system faces constant challenges in many forms such as the impacts of climate change uncertainty surrounding the use of novel technologies and the emergence of new zoonotic diseases Alongside these challenges professionals working in the food system are faced with opportunities to improve food production and distribution As decision makers attempt to balance these threats and opportunities in order to secure more sustainable production systems the key question that arises is What do we envisage as the future for agriculture and food production With numerous voices advocating different and sometimes conflicting approaches ranging from organic farming to wider use of GMOs through in vitro meat production this discussion of the future raises significant ethical questions The contributions in this book bring together a diverse group of authors who explore a set of themes relating to the ethical dimensions of the agriculture and food futures including the role of novel technologies the potential issues raised by the use of biofuels the ethics of future animal production systems concepts of global food security as well as chapters on food governance priorities and educational aspects It is intended that this volume serves as an interesting collection and acts as a source of stimulation that will contribute to wider debate and reflection on the future of the agriculture and food system
