MOTION.

THE normal and only state of matter in the universe appears to be that of motion.

Whether we take matter as masses, such as the heavenly bodies, or whether we take the atoms of matter, we can find no evidence of perfect rest anywhere. Motion, whether as masses or atoms, is the universal condition of matter. This, and not gravitation, is the universally present circumstance attendant on matter. Gravitation may, so to speak, be in abeyance somewhere; motion never. The instant one mode of motion ceases another commences. A rocket, shot away from the earth by the force developed during the combustion
