Chemical Vapour Deposition Precursors Processes And Applications:

Chemical Vapour Deposition Anthony C. Jones, Michael L. Hitchman, 2009 The book is one of the most comprehensive overviews ever written on the key aspects of chemical vapour deposition processes and it is more comprehensive technically detailed and up to date than other books on CVD The contributing authors are all practising CVD technologists and are leading international experts in the field of CVD It presents a logical and progressive overview of the various aspects of CVD processes Basic concepts such as the various types of CVD processes the design of CVD reactors reaction modelling and CVD precursor chemistry are covered in the first few Jacket

Chemical Vapour Deposition Xiu-Tian Yan, Yongdong Xu, 2010-03-23 Chemical Vapour Deposition An Integrated Engineering Design for Advanced Materials focuses on the application of this technology to engineering coatings and in particular to the manufacture of high performance materials such as fibre reinforced ceramic composite materials for structural applications at high temperatures This book aims to provide a thorough exploration of the design and applications of advanced materials and their manufacture in engineering From physical fundamentals and principles to optimization of processing parameters and other current practices this book is designed to guide readers through the development of both high performance materials and the design of CVD systems to manufacture such materials Chemical Vapour Deposition An Integrated Engineering Design for Advanced Materials introduces integrated design and manufacture of advanced materials to researchers industrial practitioners postgraduates and senior undergraduate students

Chemical vapour deposition of boron-carbon thin films from organoboron precursors Maiwulidan (Mewlude) Yimamu (Imam), 2016-01-13 Boron carbon BxC thin films enriched in 10B are potential neutron converting layers for 10B based solid state neutron detectors given the good neutron absorption cross section of 10B atoms in the thin film Chemical Vapour Deposition CVD of such films faces the challenge that the maximum temperature tolerated by the aluminium substrate is 660 C and low temperature CVD routes for BxC films are thus needed This thesis presents the use of two different organoboron precursors triethylboron B C₂H₅₃ TEB and trimethylboron B CH₃₃ TMB as single source precursors for CVD of BxC thin films The CVD behaviour of TEB in thermal CVD has been studied by both BxC thin film deposition and quantum chemical calculations of the gas phase chemistry at the corresponding CVD conditions The calculations predict that the gas phase reactions are dominated by hydride eliminations of C₂H₄ to yield BH₃ In addition a complementary bimolecular reaction path based on H₂ assisted C₂H₆ elimination to BH₃ is also present at lower temperatures in the presence of hydrogen molecules A temperature window of 600 1000 C for deposition of X ray amorphous BxC films with 2.5 x 4.5 is identified showing good film density 2.40 2.65 g cm³ which is close to the bulk density of crystalline B₄C 2.52 g cm³ and high hardness 29 39 GPa The impurity level of H is lowered to 1 at % within the temperature window Plasma chemical vapour deposition has been studied using TMB as single source precursor in Ar plasma for investigating BxC thin film deposition at lower temperature than allowed by thermal CVD and further understanding of thin

film deposition process The effect of plasma power total pressure TMB and Ar gas flow on film composition and morphology are investigated The highest B C ratio of 1.9 is obtained at highest plasma power of 2400 W and TMB flow of 7 sccm The H content in the films seems constant at 15.5 at % The B C bond is dominant in the films with small amount of C C and B O bonds which are likely due to the formation of amorphous carbon and surface oxidation respectively The film density is determined as 2.16001 g cm³ and the internal compressive stresses are measured to be
