Product-Driven Process Design Edwin Zondervan,Cristhian Almeida-Rivera,Kyle Vincent Camarda,2023-09-05 Product driven process design from molecule to enterprise provides process engineers and process engineering students with access to a modern and stimulating methodology to process and product design Throughout the book the links between product design and process design become evident while the reader is guided step by step through the different stages of the intertwining product and process design activities Both molecular and enterprise wide considerations in design are introduced and addressed in detail Several examples and case studies in emerging areas such as bio and food systems pharmaceuticals and energy are discussed and presented This book is an excellent guide and companion for undergraduate graduate students as well as professional practitioners

Creative Engineering Design Assessment Christine Charyton,2013-09-14 The Creative Engineering Design Assessment or CEDA is a newly developed tool to assess creativity specific to engineering design which is vital for innovation The revised CEDA assesses usefulness in addition to originality Both originality and usefulness are key constructs in creativity but are primarily essential and

emphasized ever more in engineering design Since the preliminary research was presented to the National Science Foundation further reliability and validity has been developed and established The CEDA is different from other general creativity measures as it demonstrates discriminant validity with the Creative Personality Scale Creative Temperament Scale and the Cognitive Risk Tolerance Scale and has demonstrated convergent validity with the Purdue Creativity Test and the Purdue Spatial Visualization Test Rotations It focuses on engineering specific measures measuring engineering creativity and spatial skills The aim of this book is to disseminate the CEDA tool for use in engineering educational programs industry NASA and the military Creative Engineering Design Assessment CEDA Background Directions Manual Scoring Guide and Uses discusses and outlines the need for creativity in our global economy and in engineering design and provides the CEDA tool in effort to achieve this
