

Land Law

Introduction to Land Law

Things v property

- Property is a power relationship
 - 'This thing is proper to me' - asserts a degree of social and legal control over that resource
- Property is a social and legal institution governing the **use** of most things, and the **allocation** of some items of social wealth (Harris, Property and Justice)
- Property denotes order (you can do what you like with your own things, but someone else cannot) of relationships between the person and the thing, and other people and the thing

Land v personal property

- Personal property is things such as books or cars etc
- Land has many uses and purposes, where personal property generally has one function
 - Food production
 - Social
 - Recreational
 - Work/commercial
 - Security
 - Shelter
- Land is however, a limited resource
- Nature of the relationship of land as property is different from the nature of the owners relationship with personal property
 - Not absolute
 - Rights can be fragmented
 - They are relative
 - All rights are subject to governmental controls
 - Eg. what you can do with the land in relation to the environment etc
- Nature of rights
 - Personal (rights in personam)
 - Proprietary (rights in rem)
 - Means 'rights in the thing'
 - Not only can you exercise your rights against the person who granted you the original relationship with the land, it also means if the land changes hands, your right runs with the land
 - You own property, and someone wants to lease the property from you for 2 years, they will pay money to lease it from you. You decide you want to sell 6 months after creating the lease, in order to make the lease enforceable against the person who the property has been sold to, must show the right is in the property and not just a contractual right against the person who sold the property. **Nature of rights in land means you are able to enforce against any third party**
