Complexity And Contradiction In Architecture 2nd Second Edition Text Only:

The Familiar and the Unfamiliar in Twentieth-century Architecture Jean La Marche, 2003 Matching the texts the architects wrote with the buildings they were designing contemporaneously he focuses on the language employed in discussing the subject to reveal the author architects distinct voices and points of view **BOOK JACKET**

Digital Draw Connections Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at re projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension As such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of representation Composed of 43 chapters written by 81 authors from around the world with an introduction by Jim Venturi and Cezar Nicolescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research

Las Vegas in the Rearview Mirror Martino Stierli, 2013 An illustrated reevaluation of the seminal architectural manifesto Learning from Las Vegas It explores the significance of this controversial publication by situating it in the artistic architectural and urbanist discourse of the 1960s and 70s and by evaluating the book s enduring influence of visual studies and architectural research

Teaching Architecture Inès Lamunière, Laurent Stalder, 2019-01-14 What are the pressing questions in architecture in teaching research and practice Based on their many years of experience professors In s Lamuni re and Laurent Stalder come together in five meetings to search for answers They describe an approach to architecture that is based on intellect as well as intuition and is both strict and pragmatic And they sketch out creative processes that are indispensable in the development of projects with all their constraints in order to master the future challenges faced by the art of building

Complexity and Contradiction in Architecture Robert Venturi, 1977-01-01 Complexity and Contradiction in Architecture is the first in a series of occasional papers concerned with the theoretical background of modern architecture Unlike other Museum publications in architecture and design the series will be independent of the Museum s exhibition program and will explore ideas too complex for presentation in exhibition form and authors will represent no single professional group According to the author this book is both an attempt at architectural criticism and an apologia an explanation indirectly of his work The examples chosen reflect his partiality for certain eras Mannerist Baroque and Rococo especially Separate chapters cover concepts such as nonstraightforward architecture complexity and contradiction vs simplification or picturesqueness contradictory levels of meaning and use in architecture and the double functioning element Also discussed are the complexity and contradiction that develops from the program of the building and reflects the inherent complexities and contradictions of living The final chapter presents

A Primer on Theory in Architecture Karen Cordes Spence, 2016-12-01 A Primer on Theory in Architecture discusses how theory is defined in architecture how it is identified its location in larger perspectives or worldviews its relationships to other areas in architecture and how it can be constructed The book explores the definition elements and characteristics of theory along with subjects associated with theory and how these associations are recognized In addition case studies tackle both individual theorists and common approaches to the topic Aimed at the new student of architectural theory if you are just beginning to tackle this subject begin with this book **AA Files**, 2007 Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations The Figure of Knowledge Sebastiaan Loosen, Rajesh Heynicks, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to
