It offers clear, conceptually integrated discussions of all of the major topics in social psychology from the time Shaver's focus on the concepts of social psychology provides a framework for students to develop their own applications. The principles of social behavior are presented in the text in the same way they develop in the individual, moving from internal processes (social perception, self-recognition) to external issues (the environment, the law that influence behavior). Shaver weaves contemporary issues into his treatment of basic theories, using examples from everyday situations. His supple writing engages students in the complexity of social behavior, and is one reason this title remained one of the most highly regarded texts in the field at the time.
