Routledge Handbook of Cultural Landscape Practice Steve Brown, Cari Goetcheus, 2023-02-14 Cultural landscapes which in the field of heritage studies and practice relates to caring for and safeguarding heritage landscapes is a concept embedded in contemporary conservation Heritage conservation has shifted from an historical focus on buildings city centres and archaeological sites to encompass progressively more diverse forms of heritage and increasingly larger geographic areas embracing both rural and urban landscapes While the origin of the idea of cultural landscapes can be traced to the late 19th century Euro American scholarship it came to global attention after 1992 following its adoption as a category of site by the UNESCO World Heritage Committee Today cultural landscape practice has

become increasingly complex given the expansion of the values and meanings of heritage the influence of environmental challenges such as human induced climate change technological advancements and the need to better understand and interpret human connections to place and landscapes The aim of this handbook is to strike a balance between theory and practice which we see as inseparable while also seeking to achieve a geographical spread disciplinary diversity and perspectives and a mix of authors from academic practitioner management and community backgrounds The Routledge Handbook of Cultural Landscape Heritage in The Asia-Pacific Kapila D. Silva, Ken Taylor, David S. Jones, 2022-07-29 The Routledge Handbook of Cultural Landscape Heritage in the Asia Pacific revisits the use growth and potential of the cultural landscape methodology in the conservation and management of culture nature heritage in the Asia Pacific region Taking both a retrospective and prospective view of the management of cultural heritage in the region this volume argues that the plurality and complexity of heritage in the region cannot be comprehensively understood and effectively managed without a broader conceptual framework like the cultural landscape approach The book also demonstrates that such an approach facilitates the development of a flexible strategy for heritage conservation Acknowledging the effects of rapid socio economic development globalization and climate change contributors examine the pressure these issues place on the sustenance of cultural heritage Including chapters from more than 20 countries across the Asia Pacific region the volume reviews the effectiveness of theoretical and practical potentials afforded by the cultural landscape approach and examines how they have been utilized in the Asia Pacific context for the last three decades The Routledge Handbook of Cultural Landscape Heritage in the Asia Pacific provides a comprehensive analysis of the processes of cultural landscape heritage conservation and management As a result it will be of interest to academics students and professionals who are based in the fields of cultural heritage management architecture urban planning landscape architecture and landscape management Managing Cultural Landscapes Ken Taylor, Jane Lennon, 2012-02-13 One of our deepest needs is for a sense of identity and belonging A common feature in this is human attachment to landscape and how we find identity in landscape and place The late 1980s and early 1990s saw a remarkable flowering of interest in and understanding of cultural landscapes With these came a challenge to the 1960s and 1970s concept of heritage concentrating on great monuments and archaeological locations famous architectural ensembles or historic sites with connections to the rich and famous Managing Cultural Landscapes explores the latest thought in landscape and place by airing critical discussion of key issues in cultural landscapes through accessible accounts of how the concept of cultural landscape applies in diverse contexts across the globe and is inextricably tied to notions of living history where landscape itself is a rich social history record widening the notion that landscape only involves rural settings to embrace historic urban landscapes townscape examining critical issues of identity maintenance of traditional skills and knowledge bases in the face of globalization and new technologies fostering international debate with interdisciplinary appeal to provide a critical text for academics students practitioners and informed community organizations

discussing how the cultural landscape concept can be a useful management tool relative to current issues and challenges With contributions from an international group of authors *Managing Cultural Landscapes* provides an examination of the management of heritage values of cultural landscapes from Australia Japan China USA Canada Thailand Indonesia Pacific Islands India and the Philippines it reviews critically the factors behind the removal of Dresden and its cultural landscape from World Heritage listing and gives an overview of Historic Urban Landscape thinking *Borobudur as Cultural Landscape* Kiyoko Kanki,Laretna T. Adishakti,Titin Fatimah,2015 Borobudur is a 9th century Buddhist temple site in Central Java Indonesia As a cultural landscape Borobudur is a site of active discussion Since the start of the International Field School on Borobudur Cultural Landscape Heritage the site of Borobudur as a cultural landscape including its mountains fields villages and historic tangible and intangible items has been considered in light of the role and potential role local communities and organization have in conservation and the living environment How can Borobudur as cultural landscape be described How are diverse activities related How can individuals contribute to its sustainability This comprehensive volume considers these questions and presents discussions by academics and local community members The book considers cultural landscape heritage saujana heritage and discusses the idea of evolutive conservation It presents geographical geological and ecological perspectives It also investigates the ancient lake that once existed as well as the topography and landscapes The book looks at the regional planning system and describes the history and potential of local communities and organizations with a focus on tourism and development Subject Asian Studies Indonesian Studies Conservation Environmental Studies

The Oxford Handbook of Public History James B. Gardner,Paula Hamilton,2017 Public history is a large and complex field with boundaries methods and subjects that are hotly debated and the Oxford Handbook of Public History reflects these complexities This book defines public history as a transnational field and public history work as analytical and active practical work informed by thoughtful reflection The book locates public history as a professional practice within an intellectual framework that is increasingly democratic technological and transnational **Scale-Sensitive Governance of the Environment** Frans Padt,Paul Opdam,Nico Polman,Catrien Termeer,2014-03-10 Sensitivity to scales is one of the key challenges in environmental governance Climate change food production energy supply and natural resource management are examples of environmental challenges that stretch across scales and require action at multiple levels Governance systems are typically ill equipped for this task due to organisational and jurisdictional specialisation and short term planning horizons Further to this scientific knowledge is fragmented along disciplinary lines and research traditions in academia and research institutions State of the art Scale Sensitive Governance of the Environment addresses these challenges by establishing the foundation for a new trans disciplinary research field It brings together and reframes a variety of disciplinary approaches using the idea of scales to create a conceptual and methodological basis for scale sensitive governance of the environment from both a natural and social science perspective This volume presents new visions methods

and innovative applications of thinking and decision making across scales in space and time to develop a holistic view on the subject. It is unique in providing an analysis on how spatial, temporal, and governance scales are constructed politically and scientifically, defined, institutionalized in governance practices, and strategically used in policy discourses. It details on how current environmental governance practices can be enriched by the use of theory on scale with specific research themes to show the benefits of recognizing scales in empirical research. It includes insightful case studies drawn from countries in the Americas, Eastern and Southern Africa, Europe, and South and Southeastern Asia, covering a wide range of environmental topics including biodiversity, climate change, commodities, tea and palm oil, cultural landscapes, energy, forestry, natural resource management, pesticides, urban development, and water management. With its comprehensive coverage of scale and scaling issues and convergence of widely different scientific approaches, this book is essential for environmental scientists, policy makers, and planners, also conservation biologists and ecologists who are involved in modeling climate change impacts and sustainability. This reference will also benefit students of environmental studies and all those who seek a response to the urgent environmental governance challenges for the decades ahead.

Landscapes, Identities and Development Zoran Roca, Paul Claval, John Agnew, 2016-12-05. Bringing together theoretical and empirical research from 22 countries in Europe, North America, Australia, South America, and Japan, this book offers a state-of-the-art survey of conceptual and methodological research and planning issues relating to landscape heritage and development. It has 30 chapters grouped in four main thematic sections: landscapes as a constitutive dimension of territorial identities, landscape history and landscape heritage, landscapes as development assets and resources, and landscape research and development planning. The contributors are scholars from a wide range of cultural and professional backgrounds, experienced in fundamental and applied research, planning, and policy design. They were invited by the co-editors to write chapters for this book on the basis of the theoretical frameworks, case study research findings, and related policy concerns they presented at the 23rd Session of PECSRL, The Permanent European Conference for the Study of the Rural Landscape, organized by TERCUD, Territory Culture and Development Research Centre, Universidade Lusófona in Lisbon and Évora, Portugal, 1-5 September 2008. With such broad interdisciplinary relevance and international scope, this book provides a valuable overview, highlighting recent findings and interpretations on historical, current, and prospective linkages between changing landscapes and natural, economic, cultural, and other identity features of places and regions; landscape-related identities as local and regional development assets and resources in the era of globalized economy and culture; the role of landscape history and heritage as platforms of landscape research and management in European contexts, including the implementation of The European Landscape Convention; and the strengthening of the landscape perspective as a constitutive element of sustainable development.

Heritage Planning Harold Kallman, Marcus R. Létourneau, 2020-11-29. This new and substantially revised edition of *Heritage Planning: Principles and Process* offers an extensive overview of the burgeoning fields of heritage planning and conservation. Positioning

professional practice within its broader applied and theoretical contexts the authors provide a firm foundation for understanding the principles history evolution debates and tools that inform heritage planning while also demonstrating how to effectively enact these processes Few published works focus on the practice of heritage planning The first edition of this book was developed to fill this gap and this second edition builds upon it The book has been expanded in scope to incorporate new research and approaches as well as a wide range of international case studies New themes reflect the emerging recognition that sustainability climate resilience human rights social justice and reconciliation are fundamental to the future of planning Heritage Planning is indispensable reading not only for professionals who transform the built environment but for anyone who wants to understand the ideas and practices of heritage planning and conservation For the benefit of student readers twelve chapters designed to accommodate the academic semester are augmented with concise summaries key terms and definitions questions and learning objectives
