Digital Capitalism Networking The Global Market System:

Digital Capitalism Dan Schiller, 1999 Schiller explores how corporate domination is changing the political and social underpinnings of the Internet. He argues that the market driven policies which govern the Internet are exacerbating existing social inequalities.

The Media Daniele Albertazzi, Paul Copley, 2013-09-13 Today arguably more than at any time in the past, media are the key players in contributing to what defines reality for the citizens of Europe and beyond. This book provides an introduction to the way that the media occupy such a position of prominence in contemporary human existence. This expanded and fully updated third edition of the bestselling *The Media: An Introduction* collects in one volume thirty-six specially commissioned essays to offer unrivalled breadth and depth for an introduction to the study of contemporary media. It addresses the fundamental questions about today's media: for example, digitisation and its effects, new distribution technologies and the implications of convergence, all set against the backdrop of a period of profound social and economic change in Europe and globally. Key features: Expert contributions on each topic; Approachable, authoritative contributions provide a solid theoretical overview of the media industry and comprehensive empirical guide to the institutions that make up the media; Further Reading and related web resource listings encourage further study. New to this edition: New five-part structure provides a broad and coherent approach to media; Part 1: Understanding the Media; Part 2: What Are the Media; Part 3: The Media Environment; Part 4: Audiences, Influences and Effects; Part 5: Media Representations. Brand new chapters on: Approaches to Media; Media Form; Models of Media Institutions; The Media in Europe; Photography; Book Publishing; Newspapers; Magazines; Radio; Television; The Internet and the Web; News; Media Economics; Policy; Public Service; Broadcasting in Europe; Censorship and Freedom of Speech; Audience Research; Sexualities; Gender; Social Class; Media and Religion; The Body; Health and Illness; Nationality and Sex Acts. Other chapter topics from the last edition fully updated. A wider, more comparative focus on Europe. *The Media: An Introduction* will be essential reading for undergraduate and postgraduate students of media studies, cultural studies, communication studies, journalism, film studies, the sociology of the media, popular culture and other related subjects.

Corporations and Cultural Industries Scott W. Fitzgerald, 2012-01-01 *Corporations and Cultural Industries* Time Warner, Bertelsmann and News Corporation by Scott Warren Fitzgerald fills an important, neglected area in communication and media studies through its sustained, theoretically grounded and empirically rich analysis of three of the most important global media conglomerates of our time: Time Warner, Bertelsmann and News Corp. The book examines how financialization processes regeared the internal operations of media corporations in a manner that pits one sector against another.

The Network Society Darin Barney, 2013-05-20 In *The Network Society*, Darin Barney provides a compelling examination of the social, political and economic implications of network technologies and their application across a wide range of practices and institutions. Are we in the midst of a digital revolution? Have new information and communication technologies given birth to a new form of society, or do they reinforce and extend

existing patterns and relationships This book provides a clear and engaging discussion of these and other questions Using a sophisticated model of the relationship between technology and society Barney investigates both what has changed and what has remained the same in the age of the Internet Among the issues discussed are debates concerning the emergence of a knowledge economy digital restructuring of employment and work globalization and the status of the nation state the prospects of digital democracy the digital divide new social movements and culture community and identity in the age of new media This book provides an accessible resource for a thoughtful engagement with life in the network society It will be essential reading for students in sociology and media and communication studies This will be a valuable textbook for undergraduate students of sociology and media and communication studies **A New Global Geometry?** Greg

Albo,2024-06-18 Scrutinizes possibilities for an equalised global order in light of recent conflicts between the world's major powers The post Cold War era is definitively over asserted US President Joe Biden as he launched the new National Security Strategy warning in late 2022 that a competition is underway between the major powers to shape what comes next American leadership the document declared would be more necessary than ever to define the future of the international order insisting that the US must marshal its unparalleled economic military and diplomatic resources to confront its geopolitical rivals Socialist Register 2024 A New Global Geometry takes stock of momentous changes on the horizon Even if these geopolitical shifts do not spell the end of globalization how might they alter its historical trajectory While it is premature to speak of the end of the liberal economic order let alone the development of a multipolar international system can we begin to assess the dimensions of a new global geometry And how might we assess the potential vulnerabilities of socialist movements worldwide alongside the potential resistance our movements might manage to present grounded in our historical demands for a democratic and equalizing world order *Vicious Circuits* Joseph Jonghyun Jeon,2019-03-12 In December of 1997 the

International Monetary Fund announced the largest bailout package in its history aimed at stabilizing the South Korean economy in response to a credit and currency crisis of the same year *Vicious Circuits* examines what it terms Korea's IMF Cinema the decade of cinema following that crisis in order to think through the transformations of global political economy at the end of the American century It argues that one of the most dominant traits of the cinema that emerged after the worst economic crisis in the history of South Korea was its preoccupation with economic phenomena As the quintessentially corporate art form made as much in the boardroom as in the studio film in this context became an ideal site for thinking through the global political economy in the transitional moment of American decline and Chinese ascension With an explicit focus of state economic policy IMF cinema did not just depict the economy it also was this economy's material embodiment That is it both represented economic developments and was itself an important sector in which the same pressures and changes affecting the economy at large were at work Joseph Jonghyun Jeon's window on Korea provides a peripheral but crucial perspective on the operations of late US hegemony and the contradictions that ultimately corrode it **Media,**

Economy and Society Christian Fuchs, 2023-11-29 This essential guide to the critical study of the media economy in society teaches students how to critically analyse the political economy of communication and the media The book introduces a variety of methods and topics including the political economy of communication in capitalism the political economy of media concentration the political economy of advertising the political economy of global media and transnational media corporations class relations and working conditions in the capitalist media and communication industry the political economy of the Internet and digital media the information society and digital capitalism the public sphere Public Service Media the Public Service Internet and the political economy of media management This will be an ideal textbook for a variety of courses relating to media and communication including Media Economics Political Economy of Communication Media Culture and Society Critical Media and Communication Studies Media Sociology Media Management and Media Business Studies
