Cultural Revolutions Reason Versus Culture In Philosophy Politics And Jihad:

Cultural Revolutions Lawrence E. Cahoon, 2007-05-02 In this probing examination of the meaning and function of culture in contemporary society Lawrence Cahoon argues that reason itself is cultural but no less reasonable for it While recent political and philosophical movements have recognized that cognition the self and politics are embedded in culture most fail to appreciate the deep changes in rationalism and liberal theory this implies others leap directly into relativism and nearly all fail to define culture *Cultural Revolutions* systematically defines culture gauges the consequences of the ineradicably cultural nature of cognition and action yet argues that none of this implies relativism After showing where other new culturalists have gone wrong Cahoon offers his own definition of culture as teleologically organized practices artifacts and narratives and analyzes the notion of cultural membership in relation to race ethnicity and primordialism He provides a theory of culture's role in how we form our sense of reality and argues that the proper conception of culture dissolves the problem of cultural relativism Applying this perspective to Islamic fundamentalism Cahoon identifies its conflict with the West as representing the break between two of three historically distinctive forms of reason Rather than being irrational he shows fundamentalism embodies a rationality only recently devalued but not entirely abandoned by the West The persistence of plural forms of reason suggests that modernization in various world cultures is compatible with continued even magnified cultural differences

Strategic Intelligence and Civil Affairs to Understand Legitimacy and Insurgency Diane E. Chido, 2019-05-31 This book describes the common pitfalls of U S military interventions in efforts at stabilization which supports post conflict societies by establishing stable governance rule of law a safe and secure environment economic development and social well being for all members of the population These efforts are often unsuccessful and can even cause harm when mission teams do not understand both the populations with whom they are engaging and policymakers The book recommends prioritizing a relational approach to stabilization with a professional and well resourced Civil Affairs and strategic intelligence approach to engagements over the current preference for transactional often lethal operations

Culture and Sustainability in European Cities Svetlana Hristova, Milena Dragičević Šešić, Nancy Duxbury, 2015-04-21 European cities are contributing to the development of a more sustainable urban system that is capable of coping with economic crises ecological challenges and social disparities in different nation states and regions throughout Europe This book reveals in a pluralistic way how European cities are generating new approaches to their sustainable development and the special contribution of culture to these processes It addresses both a deficit of attention to small and medium sized cities in the framework of European sustainable development and an underestimation of the role of culture artistic expression and creativity for integrated development of the city as a prerequisite to urban sustainability On the basis of a broad collection of case studies throughout Europe representing a variety of regionally specific cultural models of sustainable development the book investigates how participative culture community arts and more generally creativity of civic imagination are conducive

to the goal of a sustainable future of small and medium sized cities This is an essential volume for researchers and postgraduate students in urban studies cultural studies cultural geography and urban sociology as well as for policymakers and practitioners wanting to understand the specificity of European cities as hubs of innovation creativity and artistic industriousness *Deleuze and Guattari's Immanent Ethics* Tamsin Lorraine,2011-08-01 In Deleuze and Guattari s Immanent Ethics Tamsin Lorraine focuses on the pragmatic implications of Deleuze and Guattari s work for human beings struggling to live ethical lives Her bold alignment of Deleuze and Guattari s project with the feminist and phenomenological projects of grounding human action in lived experience provides an accessible introduction to their work Lorraine characterizes Deleuze and Guattari s nonfoundational approach to ethics in terms of a notion of power that comes into skillful confluence with the multiple forces of life and an immanent principle of flourishing while their conception of philosophical thought is portrayed as an intervention in the ongoing movement of life that she enacts in her own exploration of their ideas She contends that Deleuze and Guattari advocate unfolding the potential of our becoming in ways that enhance our participation in the creative evolution of life and she characterizes forms of subjectivity and cultural practice that could support such evolution By means of her lucid reading taken through the lens of feminist philosophy Lorraine is not only able to present clearly Deleuze and Guattari s project but also an intriguing elaboration of some of the project s practical implications for novel approaches to contemporary problems in philosophy feminism cultural theory and human living

Strategic Culture and Weapons of Mass Destruction K. Kartchner,J. Johnson,2009-01-05 This book describes strategic culture and its value as a methodological approach to the study of International Relations In particular the book uses strategic culture to illuminate a number of case studies on countries that have made decisions regarding the acquisition proliferation or use of weapons of mass destruction **Reason After Its Eclipse** Martin Jay,2016-04-21 Tackles a question

as old as Plato and still pressing today What is reason and what roles does and should it have in human endeavor The eminent intellectual historian Martin Jay surveys Western ideas of reason particularly in German philosophy from Kant to Habermas *Beyond Mechanism* Brian G. Henning,Adam Scarfe,2013-02-01 It has been said that new discoveries and developments in the human social and natural sciences hang in the air Bowler 1983 2008 prior to their consummation While neo Darwinist biology has been powerfully served by its mechanistic metaphysic and a reductionist methodology in which living organisms are considered machines many of the chapters in this volume place this paradigm into question Pairing scientists and philosophers together this volume explores what might be termed the New Frontiers of biology namely contemporary areas of research that appear to call an updating a supplementation or a relaxation of some of the main tenets of the Modern Synthesis Such areas of investigation include Emergence Theory Systems Biology Biosemiotics Homeostasis Symbiogenesis Niche Construction the Theory of Organic Selection also known as the Baldwin Effect Self Organization and Teleodynamics as well as Epigenetics Most of the chapters in this book offer critical reflections on the neo Darwinist outlook

and work to promote a novel synthesis that is open to a greater degree of inclusivity as well as to a more holistic orientation in the biological sciences

Nature Alive Adam Scarfe, 2018-04-18 This volume pays homage to Alfred North Whitehead's 1861-1947 profound lecture and essay entitled *Nature Alive* which was one of his most mature expressions of his process-relational metaphysics a holistic conceptual framework that renders vivid the dynamic character of the natural world and the intrinsic purposiveness selective agency and creativity of living organisms Inspired by but not beholden to Whitehead's process metaphysical lens the contributors to this volume bring a multiplicity of philosophical orientations to the table in challenging the mechanistic and reductionistic neo-Darwinian paradigm that is still dominant today in the life sciences Mechanistic neo-Darwinism views nature and living organisms as machines namely as networks of externally related and linear causal switches dials levers pulleys and gears that are at the ready for technological and biotechnological manipulation Seeking a conceptual framework and a language that are more adequate to the study of the natural world and of living creatures than the mechanistic orientation the contributors to this volume explore several of the New Frontiers of Biology which are areas of biology whose findings to some extent go beyond the explanatory confines of the Modern Synthesis of natural selection and genetics Most notably emergence theory the theory of organic selection epigenetics homeostasis chronobiology and autopoiesis research can provide us with key insights that can assist us in explaining how living agents emerged including the evolutionary origins of mentality consciousness and mind Moreover attention to the New Frontiers of Biology can serve to re-enchant our understanding of the natural world and to prevent ecological devastation through a restoration to objectivity of notions such as intrinsic purposiveness selective agency creativity and intrinsic value

Prizefighting and Civilization David C. LaFevor, 2020-05 In *Prizefighting and Civilization: A Cultural History of Boxing, Race and Masculinity in Mexico and Cuba 1840-1940* historian David C. LaFevor traces the history of pugilism in Mexico and Cuba from its controversial beginnings in the mid-nineteenth century through its exponential rise in popularity during the early twentieth century A divisive subculture that was both a profitable blood sport and a contentious public spectacle boxing provides a unique vantage point from which LaFevor examines the deeper historical evolution of national identity everyday normative concepts of masculinity and race and an expanding and democratizing public sphere in both Mexico and Cuba the United States closest Latin American neighbors *Prizefighting and Civilization* explores the processes by which boxing once considered an outlandish purveyor of low culture evolved into a nationalized pillar of popular culture a point of pride that transcends gender race and class

The Orders of Nature Lawrence Cahoon, 2013-01-01 A systematic theory of naturalism bridging metaphysics and the science of complexity and emergence
