NEAR VERTICAL INCIDENCE SKYWAVE (NVIS) KIT

The NVIS kit is an add-on accessory for the CODAN™ 9350M Antenna.

Short vertical whip antennas are poor radiators at high take-off angles. This makes short distance communications difficult, especially so in hilly terrain. Making the whip longer and more horizontal improves the high take-off angle radiation efficiency.

Improves short-range communications

Transmit and receive paths over the range of 0 to 500 kms will be greatly improved with the addition of the NVIS kit.

Easily attached to a variety of vehicles

The NVIS kit can be quickly and easily attached to a wide variety of vehicles. All fitting instructions are provided — no special tools are required.

Rugged design

The tough design of the NVIS has been proven through extensive field testing.

Easy to transport

The NVIS kit is supplied in a canvas bag for ease of transportation.

Note: The frequency range of the NVIS kit is 1.6 to 12 MHz.

Antenna mounted at bumper bar height

Antenna mounted on bull bar
