property copyright and fair use and professional qualifications and credentialing Koehler examines the development of and changes to library and information science through practice and the writings of library and information theorists and practitioners from Varro during the reign of Julius Caesar to the present He documents technological and social changes that have had foundational implications for the information professions and argues that ethical standards may be redefined overtime and new standards may emerge older precepts and newer ones coexist Not only a history this is also one of the few contemporary books suitable for use in foundational courses and courses covering information and library ethics
