Coloniality At Large Latin America And The Postcolonial Debate Latin America Otherwise:

Coloniality at Large Mabel Moraña, Enrique D. Dussel, Carlos A. Jáuregui, 2008 A state of the art anthology of postcolonial theory and practice in the Latin American context *Black Theology—Essays on Global Perspectives* Dwight N. Hopkins, 2017-06-15 Since its start in 1966 black liberation theology in the United States has continually engaged international developments with Africa and the entire world But after Nelson Mandela was released from prison in February 1990 there has been an almost twenty year break in books on black theology and international affairs *Black Theology Essays on Global Perspectives* bridges that post 1990 gap and makes a vital contact with Africa again This book conceptualizes black theology to take on the global reconfigurations and opportunities brought about by the rapidly shrinking earth of fast paced worldwide contacts In other words in the specificity of the genealogy of black theology we need to reforge ties with Africa This claim is based on tradition And in the generality of the larger worldwide intertwining of technologies and economics we need a new type of black theological leadership for the twenty first century This claim is based on today s international challenges The essays in this book draw on tradition and point forward in the midst of today s worldwide challenges and favorable possibilities given the closeness of all nations and the varieties of cultures *Sensing Decolonial Aesthetics in Latin American Arts* Juan G. Ramos, 2018-03-06 This book proposes a critical reevaluation of antipoetry nueva canci n and third cinema in relation to decolonial theory and contemporary aesthetic inquiries A prime objective of the book as a whole is to bring these separate art forms into dialogue with each as collectively contributing to an archive of decolonial art forms

Blackie, Aslam Fataar, Paul Maluleka, 2022-04-21 *Decolonising Knowledge and Knowers* contributes to the current struggles for decolonising education in the global South focusing on the highly illuminating case of South African higher education Galvanised by FeesMustFall and RhodesMustFall student protests South Africa has seen particularly intense and broad social engagement with debates over decolonising universities However

much of this debate has been consumed with definitions and meanings In contrast *Decolonising Knowledge and Knowers* shows how conceptual tools specifically from Legitimation Code Theory can be enacted in research and teaching to meaningfully work towards productive decolonisation Each chapter addresses a key issue in contemporary debates in South African higher education and show how practices concerning knowledge and knowers are playing a role drawing on quantitative and qualitative research praxis and interdisciplinary research *Social Movements and World-System Transformation* Jackie Smith, MICHAEL GOODHART, Patrick Manning, John Markoff, 2016-10-26 At a particularly urgent world historical moment this volume brings together some of the leading researchers of social movements and global social change and other emerging scholars and practitioners to advance new thinking about social movements and global transformation Social movements around the world today are responding to crisis by defying both political and epistemological borders offering alternatives to the global capitalist order that are imperceptible through the modernist lens Informed by a world historical perspective contributors explain today's struggles as building upon the experiences of the past while also coming together globally in ways that are inspiring innovation and consolidating new thinking about what a fundamentally different more equitable just and sustainable world order might look like This collection offers new insights into contemporary movements for global justice challenging readers to appreciate how modernist thinking both colors our own observations and complicates the work of activists seeking to resolve inequities and contradictions that are deeply embedded in Western cultural traditions and institutions Contributors consider today's movements in the longue dur e that is they ask how Occupy Wall Street the Arab Spring and other contemporary struggles for liberation reflect build upon or diverge from anti colonial and other emancipatory struggles of the past Critical to this volume is its exploration of how divisions over gender equity and diversity of national cultures and class have impacted what are increasingly intersectional global movements The contributions of feminist and indigenous movements come to the fore in this collective exploration of what the movements of yesterday and today can contribute to our ongoing effort to understand the dynamics of global transformation in order to help advance a more equitable just and ecologically sustainable world Epistemic Decolonization D.A. Wood, 2020-07-28 European colonization played a major role in the acquisition formation and destruction of different ways of knowing Recently many scholars and activists have come to ask Are there ways in which knowledge might be decolonized Epistemic Decolonization examines a variety of such projects from a critical and philosophical perspective The book introduces the unfamiliar reader to the wide variety of approaches to the topic at hand providing concrete examples along the way It argues that the predominant contemporary approach to epistemic decolonization leads one into various intractable theoretical and practical problems The book then closely investigates the political and scientific work of Frantz Fanon and Amílcar Cabral demonstrating how their philosophical commitments can help lead one out of the practical and theoretical issues faced by the current predominant orientation and concludes by forging links between their work and that of some contemporary feminist

epistemologists **Thresholds of Illiteracy** Abraham Acosta, 2014-04-03 *Thresholds of Illiteracy* reevaluates Latin American theories and narratives of cultural resistance by advancing the concept of illiteracy as a new critical approach to understanding scenes or moments of social antagonism Illiteracy Acosta claims can offer us a way of talking about what cannot be subsumed within prevailing modes of reading such as the opposition between writing and orality that have frequently been deployed to distinguish between modern and archaic peoples and societies This book is organized as a series of literary and cultural analyses of internationally recognized postcolonial narratives It tackles a series of the most important political aesthetic issues in Latin America that have arisen over the past thirty years or so including indigenismo testimonio the Zapatista movement in Chiapas and migration to the United States via the U S Mexican border Through a critical examination of the illiterate effects and contradictions at work in these resistant narratives the book goes beyond current theories of culture and politics to reveal radically unpredictable forms of antagonism that advance the possibility for an ever more democratic model of cultural analysis *Decolonial Perspectives on Entangled Inequalities* Encarnación Gutiérrez Rodríguez, Rhoda Reddock, 2021-02-26 This book engages with decolonial social and cultural analyses of global entangled inequalities by focusing on their local articulations globally and in particular in Germany Trinidad and Tobago and the United Kingdom **The Routledge Handbook on Cities of the Global South** Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city
