Combating Weapons Of Mass Destruction The Future Of International Nonproliferation Policy:

Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

International Law and the Proliferation of Weapons of Mass Destruction Daniel H. Joyner, 2009-03-05 Proliferation of WMD technologies is by no means a new concern for the international community Indeed since the signing of the Nuclear Non proliferation Treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states as well as their spread through the increasingly globalised channels of international trade to other states and non state actors However the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to

a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state Other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation It will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed *International Cooperation on WMD Nonproliferation* Jeffrey W. Knopf, 2016-02-15

International efforts to prevent the spread of weapons of mass destruction WMD including nuclear biological and chemical weapons rest upon foundations provided by global treaties such as the Nuclear Non Proliferation Treaty NPT and the Chemical Weapons Convention CWC Over time however states have created a number of other mechanisms for organizing international cooperation to promote nonproliferation Examples range from regional efforts to various worldwide export control regimes and nuclear security summit meetings initiated by U S president Barack Obama Many of these additional nonproliferation arrangements are less formal and have fewer members than the global treaties International Cooperation on WMD Nonproliferation calls attention to the emergence of international cooperation beyond the core global nonproliferation treaties The contributors examine why these other cooperative nonproliferation mechanisms have emerged assess their effectiveness and ask how well the different pieces of the global nonproliferation regime complex fit together Collectively the essayists show that states have added new forms of international cooperation to combat WMD proliferation for multiple reasons including the need to address new problems and the entrepreneurial activities of key state leaders Despite the complications created by the existence of so many different cooperative arrangements this collection shows the world is witnessing a process of building cooperation that is leading to greater levels of activity in support of norms against WMD and terrorism The European Union's Nuclear Non-proliferation Policy Manuel Herrera, 2025-04-15 This book looks at

European Union EU attempts to manage the risks associated with nuclear non proliferation and assesses its performance and external challenges The introductory section delves into current academic scholarship elucidating the concepts of contestation and performance The second section provides an overview of the historical and institutional evolution and the third scrutinizes the performance The final section examines present policy with case studies on the EU s bilateral relations with Iran and India Adopting a focus on both the development and performance of the EU s non proliferation and disarmament policy as well as its contestation from non Western countries this book provides a solid and innovative contribution to existing debates on both the EU s non proliferation and foreign policy The book will appeal to scholars researchers and practitioners of International Relations European Union Studies and Nuclear Non Proliferation as it provides an analysis of the intricacy of the EU s non proliferation policy offering fresh perspectives and empirical evidence

Gilboy, Eric Heginbotham, 2012-03-12 This book offers an empirical comparison of Chinese and Indian international strategic behavior It is the first study of its kind filling an important gap in the literature on rising Indian and Chinese power and American interests in Asia The book creates a framework for the systematic and objective assessment of Chinese and Indian strategic behavior in four areas 1 strategic culture 2 foreign policy and use of force 3 military modernization including defense spending military doctrine and force modernization and 4 economic strategies including international trade and energy competition The utility of democratic peace theory in predicting Chinese and Indian behavior is also examined The findings challenge many assumptions underpinning Western expectations of China and India **Disarmament under International Law** John Kierulf, 2017-01-01 Russia s annexation of Crimea and involvement in the conflict in eastern Ukraine has in many respects set back post Cold War improved relations between Russia the United States and Europe The continued war in Syria threatens the security and stability of many countries in the Middle East and attacks by ISIS and other terrorist organizations are causing increased fear and instability in Iraq and in neighbouring countries In many areas negotiations on disarmament and arms control are at a standstill In *Disarmament under International Law* John Kierulf examines and discusses how disarmament arms control and non proliferation of both conventional weapons and weapons of mass destruction are regulated in existing treaties and conventions From his perspective as a former disarmament negotiator Kierulf explains the United Nations disarmament machinery and procedures and describes the UN s essential role in promoting disarmament Underlining the continued and serious threat posed by nuclear weapons Kierulf appeals for increased and effective international efforts to reduce their number and ultimately eliminate them Presenting information and analysis on a comprehensive range of issues *Disarmament under International Law* is an essential guide for anyone interested in gaining knowledge about the current state of international security *The Treaty Prohibiting Nuclear*
