Subcommittee on Regulatory Reform, Commercial and Antitrust Law, 2014 *Transforming Everything?* Karen Mossberger, Eric W. Welch, Yonghong Wu, 2022 Broadband or high speed internet has been called the most important infrastructure challenge of the century It has the potential to connect remote communities streamline health care services and support innovation across education economics and numerous other fields Given the growing and widespread investments in broadband how can citizens and policymakers determine whether the promise of broadband is being fulfilled *Transforming Everything* offers a comprehensive guide to the complexities and possibilities of broadband as a social technology It addresses challenges for evaluating broadband initiatives across diverse contexts and proposes guidance and methods for evaluation for policymakers and researchers Contributors draw on pioneering research in program evaluation and information technology to explore broadband applications in health education and civic engagement They also address key measurement and evaluation challenges in the field today including issues in privacy and security and inadequate research methods for target populations Collectively the chapters in this volume raise important questions for improving research and evaluation in broadband use and producing actionable evidence in a highly dynamic environment *Transforming Everything* prepares readers with a critical understanding of broadband technology and the necessary evidence to assess whether broadband programs and policy are truly empowering the communities they serve

Voices of Innovation - Payers Edward W. Marx, Sakshika Dhingra, 2024-09-04 As the health delivery landscape in the United States evolves in a post COVID 19 era both incumbents and new entrants are reimagining models of care Technology and medical advancements are transforming the way care is delivered and experienced and changes in regulations and incentives across the industry are redefining how the healthcare system works and interacts As a result care delivery is undergoing several transformations from sick care to preventative whole person care from intermittent to continuous care from facility based settings to omnichannel offerings through virtual care and video or telephonic technologies and from standardized to personalized solutions In addition to healthcare providers payers are also redefining their role in care delivery through provider ownership technology and provider enablement to deliver higher value care to members While the payer community has been slow to innovate they now have an opportunity and an incentive to play an active role in reimagining the future of care delivery In the past year alone significant disruptors have entered the provider space threatening the existence of payers specifically self funded programs such as Amazon and Walmart This has served as a giant

wake up call that healthcare has shifted Now more than ever there is an emphasis on the patient and clinician experience Perhaps hastened by the pandemic the race is on for innovations from the payer community to improve patient and provider engagement Unlike other players payers have end to end visibility into individual care needs and utilization patterns across providers and settings This perspective can provide informed choices around optimal care models unlock value through improved health outcomes and lower the total cost of care for members and customers This book is loaded with numerous case studies and interviews with healthcare leaders from the payer community helping stakeholders understand how to leverage innovation leading them to superior business and clinical outcomes The book also discusses how and why data is key to innovation activities and how partnerships are key to using data effectively My TV for Seniors Michael R. Miller,2020-08-24 Easy clear readable and focused on what you want to do Step by step instructions that show you exactly how and where to watch what you want to watch Help when you have specific questions Tips and notes to help you get the most from local cable satellite and streaming TV Full color step by step tasks walk you through watching TV today on a variety of devices and saving money doing so Learn how to Cut the cable and satellite cord Save money on your cable or satellite TV bill Watch local TV stations for free Choose the best TV and streaming media player for you Connect and use an Amazon Fire TV Apple TV or Roku streaming media player Watch Amazon Prime Video CBS All Access Disney HBO Max Hulu Net_ ix Peacock and other streaming video services Watch live streaming video services like AT T TV fuboTV Hulu Live TV Sling TV and YouTube TV Find where to best watch sporting events Get a better picture with HD 4K 8K and HDR Get better sound with a sound bar or surround *Broadcasting & Cable* ,2009 **Digital Africa** Tania Begazo,Moussa Blimpo,Mark Dutz,2023-04-04 All African countries need better and more jobs for their growing populations Digital Africa Technological Transformation for Jobs shows that broader use of productivity enhancing digital technologies by enterprises and households is imperative to generate such jobs including for lower skilled people At the same time broader use can support not only countries short term objective of postpandemic economic recovery but also their vision of economic transformation with more inclusive growth These outcomes are not automatic however Mobile internet availability has increased throughout the continent in recent years but Africa s uptake gap is the highest in the world Areas with at least 3G mobile internet service now cover 84 percent of country populations averaged across Sub Saharan Africa but only 22 percent use such services The average African business lags in the use of smartphones and computers as well as more sophisticated digital technologies that catalyze further productivity gains Two issues explain the usage gap the affordability of these new technologies and the willingness to use them For the 40 percent of Africans below the extreme poverty line mobile data plans alone would cost one third of their incomes in addition to the price of access devices apps and electricity Data plans for small and medium businesses are also more expensive than in other regions Moreover shortcomings in the quality of internet services and in the supply of attractive skill appropriate apps that promote entrepreneurship and raise earnings dampen people s willingness

to use them For those countries already using these technologies the development payoffs are significant New empirical studies for this report add to the rapidly growing evidence that mobile internet availability directly raises enterprise productivity increases jobs and reduces poverty across Africa To realize these and other benefits more widely Africa s countries must implement complementary and mutually reinforcing policies to strengthen both consumers ability to pay and willingness to use digital technologies These interventions must prioritize productive use to generate large numbers of inclusive jobs in a region poised to benefit from a massive youthful workforce one projected to become the world s largest by the end of this century

Niche Envy Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track desirable customers offering them benefits in return for personal information We have all been to Web sites that welcome us by name offering us discounts deals or special access to content For the most part it feels good to be wanted to be valued as a customer But if we thought about it we might realize that we ve paid for this special status by turning over personal information to a company s database And we might wonder whether other customers get the same deals we get or something even better We might even feel stirrings of resentment toward customers more valued than we are In Niche Envy Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media advertising and society If the new goal of marketing is to customize commercial announcements according to a buyer s preferences and spending history or even by race gender and political opinions what does this mean for the twentieth century tradition of equal access to product information and how does it affect civic life Turow shows that these marketing techniques are not wholly new they have roots in direct marketing and product placement widely used decades ago and recently revived and reimagined by advertisers as part of customer relationship management known popularly as CRM He traces the transformation of marketing techniques online on television and in retail stores And he describes public reaction against database marketing pop up blockers spam filters commercial skipping video recorders and other ad evasion methods Polls show that the public is nervous about giving up personal data Meanwhile companies try to persuade the most desirable customers to trust them with their information in return for benefits Niche Envy tracks the marketing logic that got us to this uneasy impasse
