combating proliferation

An aerial photograph of a vast airfield, densely packed with hundreds of military aircraft, likely fighter jets, arranged in neat, repeating rows. The aircraft are viewed from above, showing their wings and tails. The perspective creates a strong sense of depth and scale.

Combating Proliferation Strategic Intelligence And Security Policy:

Combating Proliferation Jason D. Ellis, Geoffrey D. Kiefer, 2004-09-20 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community's flawed assessment of Iraq's weapons systems and the Bush administration's decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan's development of nuclear weapons North Korea's defiance of U N watchdogs Russia's transfer of nuclear and missile technology to Iran and China's to Pakistan the Soviet biological warfare program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration's policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers

Combating Proliferation Jason D. Ellis, Geoffrey D. Sharpening Strategic Intelligence Richard L. Russell, 2007-04-09 This book critically examines the weaknesses of American intelligence led by the Central Intelligence

Agency in informing presidential decision making on issues of war and peace It evaluates the CIA s strategic intelligence performance during the Cold War and post Cold War periods as a foundation for examining the root causes of intelligence failures surrounding the September 11th attacks and assessments of Iraq s weapons of mass destruction programs in the run up to the Iraq War The book probes these intelligence failures which lie in the CIA s poor human intelligence collection and analysis practices The book argues that none of the post 9 11 intelligence reforms have squarely addressed these root causes of strategic intelligence failure and it recommends measures for redressing these dangerous vulnerabilities in American security

Maritime Counterproliferation Operations and the Rule of Law Craig H. Allen, 2007-06-30 Allen examines the maritime counterproliferation activities of nations participating in the Proliferation Security Initiative as set out in their Statement of Interdiction Principles He explains the framework for conducting maritime interception activities examines the importance of intelligence to PSI operations and assesses the legal issues raised by those operations The threat of WMD use by terrorist groups and rogue regimes has added new urgency to global security discussions Responses to the dangers posed by WMD include the nonproliferation regime safeguards for WMD materials while in transit export controls treaties on terrorism Security Council resolutions and the new Protocol to the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation The existing nonproliferation regime will never by itself provide an adequate level of security As a result risk management strategies must include layered counterproliferation activities and consequence management Counterproliferation measures may include maritime interdictions The Proliferation Security Initiative a cooperative undertaking launched in 2003 provides a framework for those interdictions The framework was formalized in the Statement of Interdiction Principles After providing an overview of the threats posed by WMD proliferation this book surveys the nonproliferation regime and counterproliferation measures states have adopted to supplement it It next provides an overview of maritime interception operations and the intelligence issues surrounding them before turning to the laws governing such operations It then examines each of the actions described in the PSI Statement of Interdiction Principles to assess their compliance with applicable laws Finally it looks at the laws that establish the responsibility of states for taking unwarranted counterproliferation actions against vessels

Deterring International Terrorism and Rogue States James H. Lebovic, 2007-01-24 This new study challenges the widely held view that many current US adversaries cannot be deterred maintaining that deterrence is not a relic of the Cold War period and that it should shape US policies toward so called rogue states and terror groups James Lebovic argues that deterrence principles continue to apply and focuses upon the three pillars of the Bush administration s national security policy missile defence which preoccupied the administration until September 11 2001 preemption which became the US focus with the September 11 attacks and US success in overthrowing the Taliban regime in Afghanistan homeland security which the administration has portrayed as more a natural response to threat than an aspect of policy that must be reconciled with the other pillars **Deterring International Terrorism and Rogue**

States asserts that bad offences and defences have been endemic to the current US policy approach leading US policy makers to pursue policies that require them to do everything without adequate concern for resource trade offs overreach and unintended consequences This book will be of great interest to students of US foreign policy national and international security terrorism and international relations in general

Reshaping Rogue States Alexander T.J. Lennon, Camille Eiss, 2004-07-09 An analysis of the policies of preemption and regime change as well as an examination of US policy options for dealing with each country in the axis of evil In January 2002 President George W Bush declared Iran Iraq and North Korea constituents of an axis of evil US strategy toward each of these countries has clearly varied since yet similar issues and policy options have emerged for US relations with all three Reshaping Rogue States seeks to improve our understanding of Iran Iraq and North Korea as well as of current and future policy options to combat the threats these nations pose The book s comprehensive analysis of preemption and regime change debates the circumstances under which each policy might be justified or legal under international law Prominent strategists and policymakers consider alternatives to preemption including prevention counterproliferation and cooperative security and draw conclusions from efforts to bring about regime change in the past Reshaping Rogue States also reviews the differing policy challenges presented by each so called axis member Specifically it considers how the United States might strike a balance with North Korea through multilateral negotiations the changes within Iran that call for changes in US policy and the dilemmas the United States faces in post Saddam Iraq including continuing insurgency instability and the feasibility of democracy

Secrets in Global Governance Allison Carnegie, Austin Carson, 2020-06-18 Secrecy in international organizations foster information disclosures and cooperation in areas from nuclear weapons to international trade

Designing Denuclearization Bruce Larkin, 2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin s text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of

broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization **American Power after 9/11** M. Astrada, 2010-04-12 This study expounds upon the composition dynamics and consequences of the post 9 11 global security context by positing the following overarching research question how has the event of 9 11 further enabled the US to legitimately articulate disseminate and implement an absolutist security agenda ASA on the world stage

Rethinking the Principles of War Anthony McIvor, 2012-11-16 This new work features the fresh thinking of twenty eight leading authors from a variety of military and national security disciplines Following an introduction by Lt Gen James Dubik Commander I Corps U S Army and an opening essay titled State of the Question by Dr Colin Gray the anthology first considers the general question of An American Way of War Sections on operational art with writers addressing the issues in both conventional and small wars stability and reconstruction and intelligence complete the volume Among the well known contributors are Fred Kagan Ralph Peters Harlan Ullman and Milan Vego This collection of essays is the outcome of a seminar series sponsored by the Office of Force Transformation and the U S Navy to examine the future of warfare and the underlying principles of war and to educate future military strategists and leaders on these principles Footnotes index and a bibliographic essay make the work a useful tool for students of war and general readers alike
