Crossroads A Meeting Of Nations Chapter 9:

Sovereign Debt at the Crossroads Chris Jochnick, Fraser A. Preston, 2006-04-13 Recent world events have created a compelling need for new perspectives and realistic solutions to the problem of sovereign debt The success of the Jubilee 2000 movement in raising public awareness of the devastating effects of debt coupled with the highly publicized Bono O Neill tour of Africa and the spectacular default and economic implosion of Argentina have helped spur a global debate over debt A growing chorus of globalization critics galvanized by the Catholic Church s demand for forgiveness and bolstered by recent defaults has put debt near the top of the international agenda Creditor governments and international financial institutions have belatedly recognized the need for more sustainable progress on debt as an inescapable step towards economic recovery in many parts of the world This book is intended to advance the dialogue around these issues by providing a comprehensive overview of the problems raised by debt and describing new and practical approaches to overcoming them It will be the first in more than a decade to bring together under one cover the voices of prominent members of the international debt community It will include pieces from the most relevant constituencies from creditors the IMF World Bank government lenders private investors to critics debtor representatives activists and academics and analysis from economists bankers lawyers social scientists and politicians As contributions come from such leading thinkers across a range of disciplines this book will offer a timely guide for understanding and influencing the debt debate

Emerging States at Crossroads

Keiichi Tsunekawa, Yasuyuki Todo, 2018-11-30 This book is open access under a CC BY NC ND license This volume analyzes the economic social and political challenges that emerging states confront today Notwithstanding the growing importance of the emerging states in global affairs and governance many problems requiring immediate solutions have emerged at home largely as a consequence of the rapid economic development and associated sociopolitical changes The middle income trap is a major economic challenge faced by emerging states This volume regards interest coordination for technological upgrading as crucial to avoid the trap and examines how various emerging states are grappling with this challenge by fostering public private cooperation voluntary associations of market players and or social networks Social disparity is another serious problem It is deeply rooted in history in the emerging states such as South Africa and many Latin American countries However income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity Increasing pressure for political opening is another challenge for emerging states This volume argues that the economic social and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties Democratic institutions have not always been successful in this respect
