McHarg, James Corner, 2007-01-25 One of the legendary gures in twentieth century landscape design Ian McHarg transformed the fields of landscape architecture and planning through his personal methodology his unique curriculum at the University of Pennsylvania and his own inspired writing In classic texts such as his landmark 1969 book *Design with Nature* McHarg painted an incredibly rich and exuberant picture of the organic world while conjuring up a vision of a more wholesome and productive metropolis In this new entry in the popular *Conversations with Students* series we are proud to make McHarg's never before in print lecture *Collaboration with Nature* available for the first time Captured on tape in the 1970s the lecture is the sequel to *Design with Nature* This is a must read for anyone in the fields of landscape architecture environmental science and urban planning *Design in Nature* Adrian Bejan, J. Peder Zane, 2013-01-08 In this groundbreaking book Adrian Bejan takes the recurring patterns in nature trees tributaries air passages neural networks and lightning bolts and reveals how a single principle of physics the constructal law accounts for the evolution of these and many other designs in our world Everything from biological life to inanimate systems generates shape and structure and evolves in a sequence of ever improving designs in order to facilitate flow River basins cardiovascular systems and bolts of lightning are very efficient flow systems to move a current of water blood or electricity Likewise the more complex architecture of animals evolve to cover greater distance per unit of useful energy or increase their flow across the land Such designs also appear in human organizations like the hierarchical flowcharts or reporting structures in corporations and political bodies All are governed by the same principle known as the constructal law and configure and reconfigure themselves over time to flow more efficiently Written in an easy style that achieves clarity without sacrificing complexity *Design in Nature* is a paradigm shifting book that will fundamentally transform our understanding of the world around us **Design in Nature** Claus Mattheck, 2012-12-06 The chicken bone you nibbled yesterday and threw away was a high tech product Not only that it was a superlative light weight design functionally adapted to its mechanical requirements No engineer in the world has as yet been able to copy this structural member which is excellently optimized in its external shape and its internal architecture as regards minimum weight and

maximum strength The tree stem on which you recently carved your initials has also by life long care for its body steadily improved its internal and external structure and adapted optimally to new loads In the course of its biomechanical self optimization it will heal up the notch you cut as speedily as possible in order to repair even the smallest weak point which might otherwise cost it its life in the next storm This book is dedicated to the understanding of this biomechanical optimization of shape It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self optimization adaptive growth and to simulate it by computer The method newly developed for this purpose was called CAO Computer Aided Optimization With this method it is possible to predict the growth of trees bones and other biological structures from the tiger s claw to the sea urchin s skeleton
