[Fight for the Bay](#) Howard R. Ernst, 2009-11-16 In this important new book on the declining health of one of America's leading environmental treasures Howard Ernst reveals a Chesapeake bay that has become functionally dead He argues that the Chesapeake Bay succumbed to a light green environmental movement that has too often adopted a philosophy of compromise over confrontation and that has fueling a political dead zone where political leaders posture but

fail to make the hard decisions needed to achieve real improvement in the Bay's health. While blunt in his evaluation of past and present failures to restore the Bay, Ernst believes that there is still time to turn the restoration effort around and sets out new dark green strategies to do so. In the concluding chapter, five long-time bay activists provide first person accounts of their battles and hopes for the future. Hailed by Robert F. Kennedy Jr. as a must read for anyone concerned about environmental protection, this challenging book provides a wake up call for everyone concerned about the future of the Chesapeake Bay and other ecological treasures throughout America.

Media and the Environment Craig L. LaMay, Everette E. Dennis, 1991. Should environmental reporting offer advocacy or objectivity? How can the media explain complex issues of science and technology without oversimplifying? Does the prevailing definition of news limit the media's ability to report on the environment? *Media and the Environment* is the first book to explore these and other questions about how the media cover the environment.
