Writing Design Grace Lees-Maffei,2013-09-12 How do we learn about the objects that surround us As well as gathering sensory information by viewing and using objects we also learn about objects through the written and spoken word from shop labels to friends recommendations and from magazines to patents But even as design commentators have become increasingly preoccupied with issues of mediation the intersection of design and language remains under explored Writing Design

provides a unique examination of what is at stake when we convert the material properties of designed goods into verbal or textual description. Issues discussed include the role of text in informing design consumption, designing with and through language, and the challenges and opportunities raised by design without language. Bringing together a wide range of scholars and practitioners, Writing Design reveals the difficulties, ethics, and politics of writing about design. Discursive Design

Bruce M. Tharp, Stephanie M. Tharp, 2022-11-22

Exploring how design can be used for good, prompting self-reflection, igniting the imagination, and affecting positive social change. Good design provides solutions to problems. It improves our buildings, medical equipment, clothing, and kitchen utensils among other objects. But what if design could also improve societal problems by prompting positive ideological change? In this book, Bruce and Stephanie Tharp survey recent critical design practices and propose a new, more inclusive field of socially minded practice: discursive design. While many consider good design to be unobtrusive, intuitive, invisible, and undemanding, intellectually discursive design instead targets the intellect, prompting self-reflection and igniting the imagination. Discursive design, derived from discourse, expands the boundaries of how we can use design, how objects are in effect good *s* for thinking. Discursive Design invites us to see objects in a new light, to understand more than their basic form and utility. Beyond the different foci of critical design—speculative design, design fiction, interrogative design, and adversarial design—Bruce and Stephanie Tharp establish a more comprehensive unifying vision, as well as innovative methods. They not only offer social criticism but also explore how objects can, for example, be used by counselors in therapy sessions, by town councils to facilitate pre-vote discussions, by activists seeking engagement, and by institutions and industry to better understand the values, beliefs, and attitudes of those whom they serve. Discursive design sparks new ways of thinking, and it is only through new thinking that our sociocultural futures can change.
