Designing Sociable Robots Intelligent Robotics And Autonomous Agents Series:

Designing Sociable Robots Cynthia Breazeal, 2004-08-20 Cynthia Breazeal here presents her vision of the sociable robot of the future a synthetic creature and not merely a sophisticated tool A sociable robot will be able to understand us to communicate and interact with us to learn from us and grow with us It will be socially intelligent in a humanlike way Eventually sociable robots will assist us in our daily lives as collaborators and companions Because the most successful sociable robots will share our social characteristics the effort to make sociable robots is also a means for exploring human social intelligence and even what it means to be human Breazeal defines the key components of social intelligence for these machines and offers a framework and set of design issues for their realization Much of the book focuses on a nascent sociable robot she designed named Kismet Breazeal offers a concrete implementation for Kismet incorporating insights from the scientific study of animals and people as well as from artistic disciplines such as classical animation This blending of science engineering and art creates a lifelike quality that encourages people to treat Kismet as a social creature rather than just a machine The book includes a CD ROM that shows Kismet in action Designing Sociable Robots Cynthia L. Breazeal, 2002 A blueprint for the design of sociable robots as well as the story of Kismet a nascent example Social Robots Marco Nørskov, 2017-07-05 Social robotics is a cutting edge research area gathering researchers and stakeholders from various disciplines and organizations The transformational potential that these machines in the form of for example caregiving entertainment or partner robots pose to our societies and to us as individuals seems to be limited by our technical limitations and phantasy alone This collection contributes to the field of social robotics by exploring its boundaries from a philosophically informed standpoint It constructively outlines central potentials and challenges and thereby also provides a stable fundament for further research of empirical qualitative or methodological nature **Social Robotics** Miguel A. Salichs, Shuzhi Sam Ge, Emilia Ivanova Barakova, John-John Cabibihan, Alan R.
