Ethnicity and the Dementias Gwen Yeo, Linda A. Gerdner, Dolores Gallagher-Thompson, 2018-09-03 In recent years the

literature on the topic of ethnic and racial issues in Alzheimer's disease and other dementias has increased dramatically. At the same time, the need for cultural competence in all of geriatric care, including dementia care, is increasingly being acknowledged. Dementia is a large societal problem affecting all communities regardless of race or ethnicity, and understanding dementia for specific groups is tremendously important for both clinical knowledge and for health planning as a nation. This third edition of *Ethnicity and the Dementias* offers invaluable background information in this area while also examining how those suffering from dementia and their family members respond or adapt to the challenges that follow. Thoroughly updated and revised throughout, the book features contributions from leading clinicians and researchers in the field, with particular attention given to genetic and cultural factors related to dementia, effective prevention and treatment strategies, and issues in caregiving and family support. Chapters offer specific recommendations for dementia care in eleven ethnic/racial groups, as well as suggestions for working effectively with LGBTQ families. Providing a truly comprehensive resource on ethnicity and dementia and including reflections on emerging trends and the future of caregiving, this new edition is ideal reading for clinicians, educators, researchers, policy makers, and families in search of the most current ethnogeriatric findings.

Textbook of Clinical Neuropsychology Joel E. Morgan, Joseph H. Ricker, 2016-02-26. Containing 50 chapters by some of the most prominent clinical neuropsychologists, the *Textbook of Clinical Neuropsychology* sets a new standard in the field in its scope, breadth, and scholarship. Unlike most other books in neuropsychology, the *Textbook* is organized primarily around syndromes, disorders, and related clinical phenomena. Written for the clinician at all levels of training, from the beginner to the journeyman, the *Textbook* presents contemporary clinical neuropsychology in a comprehensive volume. Chapters are rich with reviews of the literature and clinical case material spanning a range from pediatric to adult and geriatric disorders. Chapter authors are among the most respected in their field, leaders of American Neuropsychology known for their scholarship and professional leadership. Rarely have so many distinguished members of one discipline been in one volume. This is essential reading for students of neuropsychology and all others preparing for careers in the field.
