Case Study Guide:

How to do your Case Study Gary Thomas, 2010-12-14 Case Study is one of the most widely applied methods of research and instruction in use today. Cases are used to frame research, aid teaching and help learning the world over. Yet despite being so widely used, there remains a great deal of uncertainty about what constitutes case study research and how case studies should be designed and carried out. In this lucid, accessible and often witty new text, Gary Thomas introduces students and researchers to the basics of case study research. Using a wide range of real life examples, this book sets out for those new to the method how best to design and carry out case studies in the social sciences and humanities. How to do your case study: a guide for students and researchers deals with the core issues and methods that anyone new to case study will need to understand. What is a case study? When and why should case study methods be used? How are case studies designed? What methods can be used? How do we analyse and make sense of our data? How do we write up and write about our case? How to do your Case Study will be essential reading for any student or researcher in the Social Sciences, Health Sciences, in Business, Studies in Education and the Humanities.

The Case Study Handbook, Revised Edition William Ellet, 2018-08-28 The guide all MBAs and executive students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require: making a decision, performing an evaluation, or diagnosing a problem, and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.
