

AP Biology Ch 13 KEY: *The Molecular Basis of Inheritance*

Key Concepts:

1. **DNA** is the genetic material.
2. Many **Proteins** work together in DNA **Replication** and repair.
3. A **Chromosome** consists of a **DNA Molecule** packed together with **Proteins (histones)**.
4. Understanding DNA structure and replication makes **Genetic Engineering** possible.

CH 13:

5. **Nucleic Acids** are unique molecules due to their ability to **direct their own replication**.
6. In this chapter you will learn:
 - How scientists deduced that **DNA was the genetic material**
 - How DNA is **replicated** (copied)
 - How cells **repair** DNA
 - How DNA is **packed** w/ **proteins** to form a chromosome.
7. The Morgan et al. group showed that **Genes** exist as parts of chromosomes. After that, the two components of chromosomes that became candidates as "the" genetic material were **DNA** and **Proteins**. Understandably, proteins were the frontrunners as they were identified as a class of macromolecules with great **heterogeneity** and **specificity** (essential characteristics for hereditary material). Nucleic acids seemed too uniform... but, this was incorrect.
8. The view of Protein's role gradually changed as the role of **DNA** in heredity was worked out in studies of **Bacteria** and the **Viruses (bacteriophages)** that infect them.
9. Concept 13.1: Discuss the experiments of the following scientists and how their experiments gave evidence to DNA as the genetic material.

Scientist	Year	Experiment (description)	Evidence gained
Frederick Griffith 	1928	Inject mice with different forms of pneumonia: -Smooth-deadly -Rough-non-deadly -Heat killed Smooth -Heat killed smooths + living Rough Heat killed pathogenic bacteria mixed with non-pathogenic in experimental group	Molecules from the dead Smooth cells can transform the Rough bacteria into the Smooth form. Assimilated the DNA. Non-pathogenic became deadly due to change in genotype — change in phenotype. Something (DNA) was taken up by the non-deadly that allowed it to transform into deadly.
