Democracy's Education Public Work Citizenship And The Future Of Colleges And Universities:

Democracy's Education Harry C. Boyte, 2021-04-30 Today Americans feel powerless in the face of problems on every front Such feelings are acute in higher education where educators are experiencing an avalanche of changes cost cutting new technologies and demands that higher education be narrowly geared to the needs of today's workplace College graduates face mounting debt and uncertain job prospects and worry about a coarsening of the mass culture and the erosion of authentic human relationships Higher education is increasingly seen and often portrays itself as a ticket to individual success a private good not a public one Democracy's Education grows from the American Commonwealth Partnership a year long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act which created land grant colleges Beginning with an essay by Harry C Boyte Reinventing Citizenship as Public Work which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students the collection brings world famous scholars senior government officials and university presidents together with faculty students staff community organizers and intellectuals from across the United States and South Africa and Japan Contributors describe many constructive responses to change already taking place in different kinds of institutions and present cutting edge ideas like civic science civic studies citizen professionalism and citizen alumni Authors detail practical approaches to making change from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment Overall the work develops a democratic story of education urgently needed to address today's challenges from climate change to growing inequality

Awakening Democracy through Public Work Harry C. Boyte, 2021-04-30 In the face of authoritarian divisive trends and multiplying crises when politics as usual is stymied Awakening Democracy through Public Work shows it is possible to build foundations for a democratic awakening grounded in deep American traditions of a citizen centered commonwealth Awakening Democracy through Public Work begins with the story of Public Achievement a youth civic education and empowerment initiative with roots in the civil rights movement It describes Public Achievement's first home in St Bernard's a low income Catholic elementary school in St Paul Minnesota and how the program spread across the country and then abroad giving birth to the larger concept of public work In Public Achievement young people practice citizen politics as they tackle issues ranging from bullying racism and sexual harassment to playground improvements curriculum changes and better school lunches They develop everyday political skills for working across differences and making constructive change Such citizen politics more like jazz than a set piece of music involves the interplay and negotiation of diverse interests and views sometimes contentious sometimes harmonious Public Achievement highlights young people's roles as co creators builders of schools communities and democratic society They are not citizens in waiting but active

citizens who do public work Awakening Democracy through Public Work also describes how public work can find expression in many kinds of work from education and health to business and government It is relevant across the sweep of society People have experimented with the idea of public work in hundreds of settings in thirty countries from Northern Ireland and Poland to Ghana and Japan In Burundi it birthed a national initiative to rework relations between villagers and police In South Africa it helped people in poor communities to see themselves as problem solvers rather than simply consumers of government services In the US at Denison University public work is being integrated into dorm life At Maxfield School in St Paul it is transforming special education In rural Missouri it led to the emPowerU initiative of the Heartland Foundation encouraging thousands of young people to stay in the region In Eau Claire Wisconsin it generated Clear Vision a program providing government support for citizen led community improvements Public work has expanded into the idea of citizen professionals working with other citizens not on them or for them It has also generated the idea of civic science in which scientists see themselves as citizens and science as a resource for civic empowerment Awakening Democracy through Public Work shows that we can free the productive powers of people to work across lines and differences to build a better society and create grounded hope for the future

Neoliberalizing the University: Implications for American Democracy

Sanford Schram,2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism's preference for market based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of New Political Science

Academic freedom, institutional autonomy and the future of democracy Sjur Bergan,Tony Gallagher,Ira

Harkavy,2020-09-15 Academic freedom and institutional autonomy are essential for universities to produce the research and teaching necessary to improve society and the human condition Academic freedom and institutional autonomy are increasingly important components of the development of democracy At the same time these fundamental democratic values are subject to pressure in many countries The relationship between academic freedom institutional autonomy and democracy

is fundamental it is barely conceivable that they could exist in a society not based on democratic principles and democracy is enriched when higher education institutions operate on this basis Higher education institutions need to be imbued with democratic culture and that in turn helps to promote democratic values in the wider society None of these issues are simple and the lines between legitimacy and illegitimacy are sometimes hard to discern as is illustrated by perspectives from Europe North America Asia Australia and the Mediterranean region

Grassroots Engagement and Social Justice through Cooperative Extension Nia Imani Fields, Timothy J. Shaffer, 2022-08-01 Grassroots Engagement and Social Justice through Cooperative Extension grows out of a commitment to the belief that Cooperative Extension professionals can and should be deeply engaged with the communities they work in to improve life individually and collectively Rooted in an understanding of the history and development of Extension the authors focus on contemporary efforts to address systemic inequities They offer an alternative to the expert model that would have Extension educators provide information detached from the difficult and sometimes contentious issues that shape community work These essays highlight Extension's role in and responsibility for culturally relevant community education that is rooted in democratic practices and social justice The ultimate aim of this book is to offer a vision for the future of Extension as its practitioners continue to reach for cultural competence necessary to address issues of systemic injustice in the communities they serve and of which they are a part

The Empowered University Freeman A. Hrabowski III, 2019-11-12 A practical and hopeful examination of how colleges and universities can create the best possible experience for students and faculty There are few higher education leaders today that command more national respect and admiration than Freeman A Hrabowski III the outspoken president of the University of Maryland Baltimore County Named one of America's Best Leaders by US News World Report and one of Time's 100 Most Influential People in the World Hrabowski has led a community transformation of UMBC from a young regional institution to one of the nation's most innovative research universities In The Empowered University Hrabowski and coauthors Philip J Rous and Peter H Henderson probe the way senior leaders administrators staff faculty and students facilitate academic success by cultivating an empowering institutional culture and broad leadership for innovation They examine how shared leadership enables an empowered campus to tackle tough issues by taking a hard look in the mirror noting strengths and weaknesses while assessing opportunities and challenges The authors dig deeply into these tough issues in higher education ranging from course redesign to group based and experiential learning entrepreneurship and civic engagement academic inclusion and faculty diversity The authors champion a holistic approach to student success focusing on teaching and learning while offering an array of financial social and academic supports for students of all backgrounds Throughout the book the authors emphasize the important role of analytics in decision making They also explore how community members and senior leaders can work together to create an inclusive campus through a more welcoming and supportive racial climate improved Title IX processes and career support for faculty of all backgrounds Ultimately The Empowered University is as much a case study of

the authors work as it is an examination of institutional change inclusive excellence and campus community partnerships Arguing that higher education can play a unique role in addressing the fundamental divisions in our society and economy by supporting individuals in reaching their full potential the authors have developed a provocative guide for higher education leaders who want to promote healthy and productive campus communities **We Are Worth Fighting For** Joshua M. Myers, 2019-12-24 The Howard University protests from the perspective and worldview of its participants **We Are Worth Fighting For** is the first history of the 1989 Howard University protest The three day occupation of the university s Administration Building was a continuation of the student movements of the sixties and a unique challenge to the politics of the eighties Upset at the university s appointment of the Republican strategist Lee Atwater to the Board of Trustees students forced the issue by shutting down the operations of the university The protest inspired in part by the emergence of conscious hip hop helped to build support for the idea of student governance and drew upon a resurgent black nationalist ethos At the center of this story is a student organization known as Black Nia F O R C E Co founded by Ras Baraka the group was at the forefront of organizing the student mobilization at Howard during the spring of 1989 and thereafter **We Are Worth Fighting For** explores how black student activists young men and women helped shape and resist the rightward shift and neoliberal foundations of American politics This history adds to the literature on Black campus activism Black Power studies and the emerging histories of African American life in the 1980s **Broadly Engaged Team Science in Clinical and Translational Research** Debra Lerner, Marisha E. Palm, Thomas W. Concannon, 2022-02-27 Despite the large U S investment in health science and the vast and growing body of peer reviewed research findings it has produced a compelling body of evidence suggests that research too often has been slow inefficient and fallen short of desired impacts on health A key question is how research might be changed to be more innovative less wasteful and more responsive to unmet health needs One emerging response within clinical and translational science is to advance an approach that attempts to close the gap between research scientists and key stakeholders the individuals and groups responsible for or affected by health related decisions Broadly engaged team science promises to support this aim by transforming the gold standard multi disciplinary team science to include key stakeholders in activities across the research spectrum These new roles and responsibilities range from generating research questions to implementing research projects to aiding in the translation of discoveries from the laboratory to the community A transition to broadly engaged team science reflects the idea that inclusivity and a diversity of perspectives are necessary to achieving progress in addressing complex health issues while representing a new benchmark for ethical research practice This is one of the first collections of papers describing how clinical and translational science researchers are defining and implementing new research practices and the successes and challenges involved This book represents a first and critical step towards organizing knowledge of broadly engaged team science and advancing the development of evidence based practices Written in an accessible style this book is intended to highlight the breadth of

broadly engaged team science within one community motivate researchers and stakeholders to build inclusive teams bring rigor to often informal stakeholder engagement research practices and encourage people to think more broadly about the development of scientific knowledge It includes examples of multi disciplinary broadly engaged team science projects the perspectives of academic leaders about the changes needed to encourage scientists to conduct broadly engaged team science and a resource directory

Climate Change across the Curriculum Eric J. Fretz, 2015-12-24 Climate Change across the Curriculum examines ways of thinking and conveying information about climate change across university curricula and within academic disciplines The contributors provide methods strategies rationales and theoretical justifications for teaching climate issues at the university level The content of this book aims to introduce climate change to classes outside of the sciences as it will take a wide range of disciplines broader institutional thinking and experimentation to fully engage university resources and knowledge toward the mitigation of fossil fuel consumption and adaptation to the negative consequences of climate change Climate Change across the Curriculum encourages professors to engage salient aspects of their academic disciplines to the study of climate issues in the classroom as well as sample theories practices and resources from a wide range of academic disciplines outside of their own areas of specialization The contributors ask what role will higher education play in addressing environmental challenges and producing students who become professionals who accomplish work that solves these problems

International Scholarships in Higher Education Joan R. Dassin, Robin R. Marsh, Matt Mawer, 2017-10-17 This book explores the multiple pathways from scholarships for international study to positive social change Bringing together studies from academic researchers evaluators and program designers and policymakers from Africa Asia Latin and North America Europe and Australia the book compiles the latest research and analysis on the policy practice and outcomes of international scholarship programs Contributions examine the broad trends in sponsored overseas study program design considerations the dynamics of the immediate post scholarship period and the impact of scholarships on international education and development Particular attention is focused on assessment and evaluation the complexities of selecting awardees the dynamics of returning home and concerns about brain drain and the state of knowledge and research on long term outcomes of international scholarships with social change aims nt
