We Lost the War on Cancer - Review of Alternative Cancer Therapies John P. Thomas, 2014-08-25 We have lost the war on cancer At the beginning of the last century one person in twenty would get cancer In the 1940s it was one out of every sixteen people In the 1970s it was one person out of ten Today one person out of three gets cancer in the course of their life The cancer industry is probably the most prosperous business in the United States In 2014 there will be an estimated 1 665 540 new cancer cases diagnosed and 585 720 cancer deaths in the US 6 billion of tax payer funds are cycled through various federal agencies for cancer research such as the National Cancer Institute NCI The NCI states that the medical costs of cancer care are 125 billion with a projected 39 percent increase to 173 billion by 2020 The simple fact is that the cancer industry employs too many people and produces too much income to allow a cure to be found All of the current research on cancer drugs is based on the premise that the cancer market will grow not shrink John Thomas explains to us why the current cancer industry prospers while

treating cancer but cannot afford to cure it in Part I In Part II he surveys the various alternative cancer therapies that have been proven effective but that are not approved by the FDA
