Nature, Landscape, and Building for Sustainability William S. Saunders, 2008 The complexity and scale of the environmental problems confronting humanity today provoke a wide range of responses from indifference to anger to creativity Among a growing number of architects landscape architects and planners however these problems have inspired a new vision sustainability to guide their practices In Nature Landscape and Building for Sustainability a diverse group of contributors considers the

concept of sustainability both philosophically and practically Some take a broad view of the divisions between nature and humanity exploring the incomprehensible scale of human intervention in the natural world the relationship between how we feel about nature and what we do about it and the commodification of the natural world Other essays focus on sustainable design practices sustainability s roots in the American conservation tradition its utility as a framework for future design practice and the necessity of moving beyond demonstration projects into the mainstream Together these essays suggest that the gap between the promise and reality of sustainable design although significant can be bridged through diligence and practice Contributors D Michelle Addington Yale U John Beardsley Harvard Graduate School of Design Albert Borgmann U of Montana Missoula Peter Buchanan Peter Del Tredici Harvard Graduate School of Design Robert France Harvard Graduate School of Design Susannah Hagan U of East London Kristina Hill U of Virginia Catherine Howett U of Georgia Niall Kirkwood Harvard Graduate School of Design Lucy R Lippard Bill McKibbin Michael Pollan Rossana Vaccarino Vaccarino Associates St Thomas William S Saunders is editor of Harvard Design Magazine and assistant dean for external relations at Harvard University s Graduate School of Design He is editor of five previous Harvard Design Magazine Readers published by the University of Minnesota Press Robert L Thayer Jr is emeritus professor of landscape architecture and founder of the landscape architecture program at the University of California Davis

Wetlands For Tropical Applications: Wastewater Treatment By Constructed Wetlands Norio Tanaka,Wun Jern Ng,K B Shameen N Jinadasa,2011-06-24 This book provides a systematic exposition of the design features of constructed wetlands and their management in terms of siting physical maintenance and operation Only very few books or chapters have been published on constructed wetlands in tropical conditions and none are current The selection of plant species managing their growth and harvesting cycles and the impact these have on the attenuation of organic and inorganic pollutants nutrients and pathogens would be of interest to students and practitioners of the art working under tropical conditions The potential of constructed wetlands as a low cost intervention for developing countries in tropical regions that faced water pollution problems in particular deserves to be explored systematically

Wastewater Treatment in Constructed Wetlands with Horizontal Sub-Surface Flow Jan Vymazal,Lenka Kröpfelová,2008-07-15 Wetlands have been used for uncontrolled wastewater disposal for centuries However the change in attitude towards wetlands during the 1950s and 1960s caused the minimization of the use of natural wetlands for wastewater treatment at least in developed countries Constructed wetlands have been used for wastewater treatment for about forty years Constructed wetland treatment systems are engineered systems that have been designed and constructed to utilize the natural processes for removal of pollutants They are designed to take advantage of many of the same processes that occur in natural wetlands but do so within a more controlled environment The aim of this book is to summarize the knowledge on horizontal s surface flow constructed wetlands HF CWs and objectively evaluate their treatment efficiency under various conditions The information on this type of wastewater treatment technology is scattered in many publications

but a comprehensive summary based on world wide experience has been lacking The book provides an extensive overview of this treatment technology around the world including examples from more than 50 countries and examples of various types of wastewater treated in HF CWs
