Democracy And Coercive Diplomacy Cambridge Studies In International Relations:

Democracy and Coercive Diplomacy Kenneth A. Schultz, 2001-07-26 In this book first published in 2001 Kenneth Schultz explores the effects of democratic politics on the use and success of coercive diplomacy He argues that open political competition between the government and opposition parties influences the decision to use threats in international crises how rival states interpret those threats and whether or not crises can be settled short of war The relative transparency of their political processes means that while democratic governments cannot easily conceal domestic constraints against using force they can also credibly demonstrate resolve when their threats enjoy strong domestic support As a result compared to their non democratic counterparts democracies are more selective about making threats but those they do make are more likely to be successful that is to gain a favorable outcome without resort to war Schultz develops his argument through a series of game theoretic models and tests the resulting hypothesis using both statistical analyses and historical case studies **The**

Social Construction of the Ocean Philip E. Steinberg, 2001-10-25 This 2001 book presents a history of the uses regulations and representation of the world ocean from approximately 1450 through the present This history is told through a territorial political economy lens borrowing from world systems theory economic geographic studies of the spatiality of capitalism political geographic work on the history of territoriality and post structural work on social conflict in the production of space Just as the modern era has been characterized by a conflicting set of dynamic and contested spatiality on land so has it been characterized by a conflicting set of spatial functions at sea Evidence is marshaled from legal texts literary and artistic creations cartographic representations advertisements commercial and military history and policy debates The book concludes by considering how lessons learned from the history of the ocean may be applied to emerging spaces such as cyberspace where there is a similarly problematic fit between social processes and the institutions of state governance

Regions of War and Peace Douglas Lemke, 2002-01-21 In this contribution to the literature on the causes of war Douglas Lemke asks whether the same factors affect minor powers as affect major ones He investigates whether power parity and dissatisfaction with the status quo have an impact within Africa the Far East the Middle East and South America Lemke argues that there are similarities across these regions and levels of power and that parity and dissatisfaction are correlates of war around the world The extent to which they increase the risk of war varies across regions however and the book looks at the possible sources of this cross regional variation concluding that differential progress toward development is the likely cause This book will interest students and scholars of international relations and peace studies as well as comparative politics and area studies **Deterrence Now** Patrick M. Morgan, 2003-04-17 Patrick Morgan's authoritative study revisits the place of deterrence after the Cold War **The Politics of International Law** Christian Reus-Smit, 2004-04-29 Politics and law appear deeply entwined in contemporary international relations Yet existing perspectives struggle to understand the complex interplay between these aspects of international life In this path breaking

volume a group of leading international relations scholars and legal theorists advance a new constructivist perspective on the politics of international law. They reconceive politics as a field of human action that stands at the intersection of issues of identity, purpose, ethics, and strategy, and define law as an historically contingent institutional expression of such politics. They explain how liberal politics has conditioned modern international law and how law feeds back to constitute international relations and world politics. This new perspective on the politics of international law is illustrated through detailed case studies of the use of force, climate change, landmines, migrant rights, the International Criminal Court, the Kosovo bombing campaign, international financial institutions, and global governance.

International Relations Theories Timothy Dunne, Milja Kurki, Steve Smith, 2021. Unrivalled coverage of international relations theories from leading experts whose case studies show you how theory can be applied to address concrete political problems. In this best-selling text, contributors to Dunne, Kurki, and Smith explore the full spectrum of theoretical perspectives and debates ranging from the historically dominant traditions of realism, liberalism, and Marxism to prominent critical approaches from feminism and postcolonialism to green theory. Each chapter is dedicated to a particular theory and features a case study that shows how theory can be used to explain real-world political dilemmas. New to this edition: A new chapter sixteen on global international relations encourages you to explore the context in which IR developed and appreciate the importance of viewing international relations theories from diverse representative perspectives. Chapters have been fully revised to reflect recent events including the Trump Presidency, developments in climate change politics, and the Covid-19 pandemic. The case studies help you to apply theories to real-world issues. Revised introduction to each part provides an overarching narrative to the text, helping you to understand and interpret different approaches. Updated online resources include guidance on answering case study questions, encouraging you to reflect upon and critically evaluate what you have learnt.

Book jacket: The Oxford Handbook of the Political Economy of International Trade Lisa L. Martin, 2015. The Oxford Handbook of the Political Economy of International Trade presents the most up-to-date review of scholarship in this field. Building on an understanding of the economic interests that drive international trade, political scientists integrate theories of domestic society, domestic institutions, and international organizations to further our understanding of this vital force of globalization. This volume both surveys established theory and showcases cutting-edge research.

Negotiating International Water Rights Muserref Yetim, 2016-06-28. Transboundary watercourses account for an estimated 60 per cent of global freshwater flow and support the livelihoods of hundreds of millions of people worldwide. Yet the indeterminate status of water rights in many international watercourses presents a problem, and many attempts to resolve water rights issues have failed. Knowing how and where negotiations fail is essential if successful resolution is to be achieved. Muserref Yetim's important book seeks to illustrate a means to the peaceful resolution of natural resource-based conflicts. Through a detailed study of the Tigris-Euphrates water conflict involving Turkey, Syria, and Iraq, countries of vital security interest to the world at large, the author clarifies the collective action dilemmas confronting

Middle Eastern watercourses and reveals the bargaining bottlenecks where negotiations fail She develops an original framework that explains bargaining failures and proposes conditions for creating a new property rights regime among watercourse states that offers a route to governing their shared water resources in ways that are politically economically and environmentally sound In almost all water scarce regions international water resources are subject to intense unilateral exploitation in a highly competitive fashion And as demand for freshwater continues to increase through increasing urbanization and the continuing development of societies so the issue of how such shared water resources can best be governed is becoming vitally important Negotiating International Water Rights offers both a timely contribution to a matter of international concern and important insights into resource conflict in countries of vital security interest to the world at large

New Directions for International Relations Bruce Russett,Alex Mintz,2005-02-11 Why does the academic study of international relations have limited impact on the policy community When research results are inconsistent inconclusive and contradictory a lack of scholarly consensus discourages policy makers the business community and other citizens from trusting findings and conclusions from IR research In New Directions for International Relations Alex Mintz and Bruce Russett identify differences in methods of analysis as one cause of these problematic results They discuss the problem and set the stage for nine chapters by diverse scholars to demonstrate innovative new developments in IR theory and creative new methods that can lay the basis for greater consensus Looking at areas of concern such as the relationship between lawmaking and the use of military force the challenge of suppressing extremists without losing moderates and the public health effects of civil conflict contributors show how international relations research can generate reliable results that can be and in fact are used in the real world
