Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition Jinghao Zhou, 2020-07-23

History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War As a result the socialist camp was dissolved China is one of the few communist countries to survive in the twenty first century The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s guided by the China model China became the world s second largest economy in 2010 and has quickly expanded its enormous global market and political influence The second global competition between the capitalist countries and China has started The second global competition is in fact between the China model and the Washington Consensus Will Western hegemonies end as the result of the second global competition Will China be able to rewrite the international rules Will the Chinese communist political system collapse during the competition What should the West do to the China model This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China s global expansion are the two sides of the same coin The China model is losing its power but not broken China would be able to become even stronger if it could reshape the philosophical foundation of the China model The future of Western hegemony will depend on how the West understands the China model and deals with it This book addresses these aspects and more

Bates Gill,2006-10-04 *Challenges and Opportunities for U.S.-China Cooperation on Climate Change* United States.

Congress. Senate. Committee on Foreign Relations,2009

Kindl,2018-02-01 The dynamics of internal changes in China whether these changes impact its national economy or its

political order and distribution of power have imminent influence on its relations with the rest of the world The important and perhaps less treated question vis vis China s rise is how and to what extent do internal changes in China affect its external behavior and thus its relations with the current world hegemon the United States In addition this publication asks what the clash of two politically culturally and economically different internal orders of the US and China will mean for their future interactions in the twenty first century The aim of this publication is not to measure and encompass the entirety of the posed question but rather to provide an incursion into this problem through two specific case studies one focusing on the interactions of two distinct political cultures and the other on the economic geopolitical and ideological interplay of the US and China on the African continent As will be demonstrated incompatible as the two regimes and their respective foreign policies may seem they will not necessarily predestine conflicts in mutual relations As America can well coexist with China even if it does not meet the Western standards of a liberal democracy so does the competition in Africa between these two major powers not have to amount to a zero sum game At the end of the day both countries might meet halfway in their respective political interactions

The Rule of Culture Hong Hai,2019-10-28 Culture has an abiding influence on the way countries and business corporations are governed This book introduces the reader to the deep philosophies that drive corporations and governments in East Asia from China through Japan and South Korea to Singapore With sparkling clarity and spiced with anecdotes and case studies it depicts how respect for cultures can lead to spectacular success or the lack of it to failure Confucian practices such as guanxi in Chinese society the benevolent culture of entity firms in Japan and patriarchal chaebols in South Korea are analyzed with examples like Esquel Nissan and Samsung A delightful chapter on Daoism shows how it drives Jack Ma s Alibaba com In the governance of nations the author reinforces Burke s dictum that systems of government must be consonant with traditional cultures and he calls out misguided attempts by the West to foist liberal democracies on civilizations in the East where respect for authority and communitarian values come before individual interest The author advances the novel concept of the meritocratic democracy in which leaders are chosen not by electoral popularity but by proven ability In a thought provoking concluding chapter he evaluates prospective constitutional changes in China that would enshrine meritocratic democracy as an alternative to liberal democracies that have turned dysfunctional in many Western nations
