Comunidades Virtuales Y Redes Sociales:

El ePaciente y las redes sociales Vicente Traver Salcedo, Luis Fernández-Luque, Ignacio Basagoiti, 2010-03-03 El ePaciente y las redes sociales es un libro que aborda en profundidad el tema de los pacientes y las redes sociales es decir la web 2.0 aplicada a la salud desde la perspectiva del paciente. A través del libro se hace un estudio detallado de este movimiento participativo analizando sus luces y sus sombras se presentan los principales recursos disponibles relacionados y se plantean las tendencias de futuro. Se ha creado una web con información sobre el libro www.salud20.es **Todo lo que hay que saber de comunidades virtuales y redes sociales** José Antonio Gallego Vázquez, 2012 *Estrategias empresariales en la web 2.0. Las redes sociales online* Araceli Castelló Martínez, 2013-06-19 Las posibilidades de branding afinidad con el target generación de notoriedad con costes reducidos canal de venta y fidelización y creación de comunidades en torno a la marca entre otras hacen de Internet un medio cuanto menos necesario en los planes estratégicos de los anunciantes. Con las nuevas formas de entender el medio que instaura la llamada Web 2.0 se abren nuevas posibilidades gracias a la mayor capacidad de segmentación orientación empresarial hacia el cliente y viralidad. En espacios como las redes sociales online las empresas pasan de ofrecer servicios tradicionales a participar en conversaciones que aporten valor y contenido de interés para los usuarios en un entorno favorable tanto para consumidores como para marcas. En este nuevo panorama en el que el poder lo tiene el usuario conversar con los clientes y escucharles es la clave del éxito. El paso del actor racional al hombre relacional obliga a las empresas a practicar un marketing dialogante e interactivo y la capacidad de escucha acerca de todo aquello que le preocupa va a determinar el éxito o fracaso de la organización **AC/E Digital Culture Annual Report 2014** AC/E, 2014-04-02 The AC/E Digital Culture Annual Report aims to become an annual document of reference that analyses the evolution of digital trends in the cultural sector: museums, libraries, publishing companies, booksellers, theatre companies, film production, music companies, etc. It is designed to be a manual for constant reference and consultation for cultural sector professionals wishing to discover the advantages/benefits derived from the use of new technologies. The first report coordinated by Javier Celaya of Dosdoce.com analyses the impact of the Internet in the overall cultural sector as well as it provides a specific focus on the use of new technologies in the performing arts: production, promotion, staging, distribution, etc. Each year the report will focus on a specific area of the cultural sector. The aim of the study is to exchange knowledge by identifying cases of success and good practices at both the national and international levels in order to enhance performing arts professionals' awareness of the possibilities new technologies can offer their entities and also of the digital trends they will need to bear in mind in the coming years. In this regard the report is much more than just an initial compilation of the statistical data needed to establish the point of departure and current use of different types of technology. This study involves preliminary research and is open to the participation of any cultural entity wishing to contribute its experience and present cases of good practice and success in the use of different types of
