Conceptual Basis Language Rle Linguistics:

The Conceptual Basis of Language (RLE Linguistics A: General Linguistics) David McNeill, 2014-01-10 In this volume the author deals explicitly and literally with the speech thought relationship Departing boldly from contemporary linguistic and psycholinguistic thinking the author offers us one of the truly serious efforts since Vygotsky to deal with this question A unifying theme is the organization of action and speech is seen as growing out of sensory motor representations that are simultaneously part of meaning and part of action

The Prefunctional Stage of First Language Acquisition (RLE Linguistics C: Applied Linguistics) Ianthi-Maria Tsimpli, 2014-02-03 This book provides a theory of first language acquisition in the syntactic framework of the theory of Universal Grammar It addresses issues related to the earliest stage of development which ends roughly around the child's second birthday The theory put forward capitalises on the traditional observation that early child grammars characteristically lack lexical and morphological elements which belong to the closed class system This book provides an account of the grammatical differences between the set of functional categories and the substantive categories

Data through Movement Francesco Cafaro, Jessica Roberts, 2022-06-01 When you picture human data interactions HDI what comes to mind The datafication of modern life along with open data initiatives advocating for transparency and access to current and historical datasets has fundamentally transformed when where and how people encounter data People now rely on data to make decisions understand current events and interpret the world We frequently employ graphs maps and other spatialized forms to aid data interpretation yet the familiarity of these displays causes us to forget that even basic representations are complex challenging inscriptions and are not neutral they are based on representational choices that impact how and what they communicate This book draws on frameworks from the learning sciences visualization and human computer interaction to explore embodied HDI This exciting sub field of interaction design is based on the premise that every day we produce and have access to quintillions of bytes of data the exploration and analysis of which are no longer confined within the walls of research laboratories This volume examines how humans interact with these data in informal not work or school environments particularly in museums The first half of the book provides an overview of the multi disciplinary theoretical foundations of HDI in particular embodied cognition conceptual metaphor theory embodied interaction and embodied learning and reviews socio technical theories relevant for designing HDI installations to support informal learning The second half of the book describes strategies for engaging museum visitors with interactive data visualizations presents methodologies that can inform the design of hand gestures and body movements for embodied installations and discusses how HDI can facilitate people's sensemaking about data This cross disciplinary book is intended as a resource for students and early career researchers in human computer interaction and the learning sciences as well as for more senior researchers and museum practitioners who want to quickly familiarize themselves with HDI

Semantic Structures (RLE Linguistics B: Grammar) David L. Waltz, 2014-02-03 Natural language understanding is central

to the goals of artificial intelligence Any truly intelligent machine must be capable of carrying on a conversation dialogue particularly clarification dialogue is essential if we are to avoid disasters caused by the misunderstanding of the intelligent interactive systems of the future This book is an interim report on the grand enterprise of devising a machine that can use natural language as fluently as a human What has really been achieved since this goal was first formulated in Turing's famous test What obstacles still need to be overcome

Production and Comprehension of Utterances (RLE Linguistics B: Grammar) I.M. Schlesinger, 2014-01-10 In this volume the author reviews the results of research on language performance and proposes a model of production and comprehension Although recent developments in linguistics are taken into account consideration of other requirements of a performance model leads to the conclusion that the grammar the speaker has in mind differs from the grammar as currently conceived of by most linguists The author is also critical of recent computer simulations of language performance on the basis that they fall short of describing what goes on in human production and comprehension The author therefore proposes that the basic issues must be rethought and new theoretical foundations reformulated in order to arrive at a viable theory of language functioning In developing the framework of the model presented in this book requirements of flexibility in the performance mechanisms the probabilistic nature of comprehension processes and the interleaving of linguistic rules with context and knowledge of the world are emphasized

Foundations of General Linguistics Martin Atkinson, Iggy Roca, David Kilby, 2014-01-10 The first edition of this major introduction to linguistics rapidly established itself as an important student textbook and a reference tool for those who already have some acquaintance with linguistics This second edition has been updated and revised and includes new chapters on syntax and on current developments in generative grammar as well as new material on the nature of language and on morphology This book first provides a comprehensive critical review of the analytic tools and theories of linguistics and systematically surveys major concepts in phonetics phonology morphology syntax and semantics Having established the basic nature and structure of language the final part of the book engages some of the wider issues concerning the use of language in speaking and understanding psycholinguistics language development in children social aspects of language sociolinguistics and historical language choice

Theoretical Linguistics and Disordered Language (RLE Linguistics B: Grammar) Martin Ball, 2014-01-10 The rapid increase of interest in disordered speech and language among linguists over the past decade or so has resulted in many books of practical help to speech pathologists in terms of assessment and remediation Little however has appeared to examine the theoretical implications of the interaction between these two fields This book aims to fill this gap by showing how speech pathology can inform linguistic theory and vice versa

Basic Word Order (RLE Linguistics B: Grammar) Russell S Tomlin, 2014-02-03 This book examines the frequencies of the six possible basic word or constituent orders SOV SVO VSO VOS OSV OVS provides a typologically grounded explanation for those frequencies in terms of three independent functional principles of linguistic organization From a database of nearly 1 000

languages and their basic constituent orders a sample of 400 languages was produced that is statistically representative of both the genetic and areal distributions of the world's languages. This sample reveals the following relative frequencies in order from high to low of basic constituent order types: 1 SOV and SVO, 2 VSO, 3 VOS and OVS, 4 OSV. It is argued that these relative frequencies can be explained to be the result of the possible interactions of three fundamental functional principles of linguistic organization. Principle 1, the thematic information principle, specifies that initial position is the cross-linguistically favoured position for clause-level thematic information. Principle 2, the verb-object bonding principle, describes the cross-linguistic tendency for a transitive verb and its object to form a more tightly integrated unit syntactically and semantically than does a transitive verb and its subject. Principle 3, the animated principle, describes the cross-linguistic tendency for semantic arguments which are either more animate or more agentive to occur earlier in the clause. Each principle is motivated independently of the others, drawing on cross-linguistic data from more than 80 genetically and typologically diverse languages. Given these three independently motivated functional principles, it is argued that the relative frequency of basic constituent order types is due to the tendency for the three principles to be maximally realized in the world's languages. SOV and SVO languages are typologically most frequent because such basic orders reflect all three principles. The remaining orders occur less frequently because they reflect fewer of the principles. The 1,000 language database and the genetic and areal classification frames are published as appendices to the volume.

Redefining Linguistics (RLE Linguistics A: General Linguistics) Hayley G. Davis, Talbot J. Taylor, 2014-02-03. The academic discipline of linguistics is at a critical stage of development. Whatever consensus there may have been fifteen or even ten years ago is fast disappearing. A process of redefinition is underway and it is the aim of this volume to contribute to that process: explain why a redefinition is needed and how it should proceed. In the case of linguistics, the subject is also the subject-matter. Many linguists have ignored the problem of definition, simply regarding linguistics as the science of language itself. What, though, is language itself? Is it a language, i.e. English, Swahili, or language in a more general sense? The primary goal of a redefinition of linguistics should be to demonstrate that language is not an objective matter. Linguistics is and should be the study of whatever is linguistically pertinent. A linguistics redefined would look at how we interpret and construct our day-to-day communication acts, what views of language are shared by and opposed by societies, and the source and roles that these views play in our living and learning experience. These papers argue the case for such a redefinition more explicitly than has ever been done before in modern linguistic theory. Such a redefined perspective precisely because it is a perspective subject to outside influence and in constant dialogue with the perspective of the other human sciences must be endlessly redefined.

The Foundations of Linguistic Theory (RLE Linguistics B: Grammar) Nigel Love, 2014-02-03. For Roy Harris, the fundamental problem about linguistics is that it has been led astray by the fact that we are capable intellectually of decontextualising our own verbal behaviour. A whole interlocking system of doctrines about forms, meanings, and communication has arisen, designed to support

the idea that one particular kind of decontextualising analysis is a prerequisite for rather than a retrospective reflection on that behaviour Against this in 13 essays collected here for the first time Harris argues for a fresh start which recognises that we create language as we go both as individuals and as communities just as we create our social structures forms of artistic expression moral values and everything else we call civilisation If Harris s thought can be put in a nutshell it is that all utterances whether written or spoken have to appear in a context and that context is an integral part of the utterance There is no such thing as a contextless utterance
