Consciousness Intent And The Structure Of The Universe

George James Ducas

Consciousness Intent And The Structure Of The Universe:

Consciousness, Intent, and the Structure of the Universe Jeffrey Keen, 2005 A ground breaking book which challenges accepted beliefs by proving with scientific precision that consciousness involves more than just your brain and actually depends on the very fabric of the Universe Is this book the missing link that some scientists have been reluctant to accept Jeffrey Keen explores consciousness and its relation to the universe This book is the culmination of years of research work by Keen who has identified observed and measured universal energy fields that have not previously been detected either by the usual five senses or by existing scientific instruments Through his pioneering discoveries this book unquestionably demonstrates and explains the ancient mystery of dowsing and its connection to the cosmos Evidence is provided that there exists a universally pervading Information Field which is the current front runner in the evolution of understanding consciousness The book demonstrates that because the brain readily interacts with the Information Field there is a link between consciousness intent and the structure of the Universe quantum theory and other topics currently being researched in Physics All of the above has been achieved by using the orthodox scientific approach of involving geometry numbers universal constants ratios and measurement It is shown that the conscious mind extends over vast distances and is much more than just a physical brain within a skull The above interpretations of experimental results have fundamental significance This changes the way we see the Universe and should gradually produce a paradigm shift in the way we think comparable to us no longer believing that the Sun goes round the Earth in spite of it appearing to be obvious These are indeed exciting times

The Intention Experiment Lynne McTaggart, 2008-02-05 Draws on original experiments as well as scientific research to explore a theory that the entire universe is connected by a vast energy field that can be manipulated for the betterment of the world using positive thought processes

The Mind's Interaction with the Laws of Physics and Cosmology Jeffrey S Keen, 2019-01-14 This ground breaking book is about the emerging academic and practical study of subtle energies which historically have not been easy to detect The unique experiments numerous measurements and resulting data presented here have been collected over 30 years of research The findings have resulted from pioneering discoveries leading to equations graphs universal constants formulae and laws of nature that eventually connect to cosmology and the structure of the universe The book proves with high scientific and mathematical precision that consciousness involves more than just the brain but actually depends on the very fabric of the universe Some of the discoveries prove that certain information can be communicated across the solar system not only faster than light but instantaneously The book deals with the entanglement of large objects and the fact that the cosmos possesses a universal consciousness Also shown is that the mind can detect information from the outer planets and identifies connections to a five dimensional universe and the mysterious recently discovered dark energy This text will be of interest to the considerable number of people worldwide involved in similar studies These include researchers at universities and colleges currently or

The Vibrational Matrix Manhiel Marthin, 2025-03-11 This book represents a profound journey into understanding the fundamental mechanisms through which our reality is constructed Its content introduces us to a revolutionary perspective in which consciousness emerges as the primordial element shaping the universe we experience The work meticulously explores how every thought emotion and action acts as a vibration that influences the very fabric of existence Through quantum principles and universal vibrational laws it reveals how our perceptions and beliefs shape not only our personal reality but also the collective one One of the most profound aspects of the book is its explanation of how vibrational frequencies interact and intertwine creating patterns that give rise to what we perceive as physical reality This transformative understanding allows us to glimpse the inherent power we possess to consciously shape our world The text delves into fundamental concepts such as universal interconnectedness the vibrational nature of matter and energy and the crucial role intention plays in manifesting reality These ideas challenge our traditional understanding of the physical world and invite us to expand our perception beyond conventional boundaries

Transcending the Speed of Light Marc Seifer, 2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of

scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe

The Romance of Reality Bobby Azarian, 2022-06-28 Why do we exist For centuries this question was the sole province of religion and philosophy But now science is ready to take a seat at the table According to the prevailing scientific paradigm the universe tends toward randomness it functions according to laws without purpose and the emergence of life is an accident devoid of meaning But this bleak interpretation of nature is currently being challenged by cutting edge findings at the intersection of physics biology neuroscience and information theory generally referred to as complexity science Thanks to a new understanding of evolution as well as recent advances in our understanding of the phenomenon known as emergence a new cosmic narrative is taking shape Nature's simplest parts come together to form ever greater wholes in a process that has no end in sight In *The Romance of Reality* cognitive neuroscientist Bobby Azarian explains the science behind this new view of reality and explores what it means for all of us In engaging accessible prose Azarian outlines the fundamental misunderstanding of thermodynamics at the heart of the old assumptions about the universe's evolution and shows us the evidence that suggests that the universe is a self organizing system one that is moving toward increasing complexity and awareness Cosmologist and science communicator Carl Sagan once said of humanity that we are a way for the cosmos to know itself *The Romance of Reality* shows that this poetic statement in fact rests on a scientific foundation and gives us a new way to know the cosmos along with a riveting vision of life that imbues existence with meaning nothing supernatural required

Trans-Dimensional Unified Field Theory George James Ducas, 2011-06-06 The concept of a First Cause of all reality or God can be arrived at through science metaphysics and philosophy This book establishes unification by defining parameters of equivalency through mathematics with the conclusion that all reality is consciousness The keys to the universe and description of equivalency are defined God can be known though works in creation when the true nature of being is understood truth known and the universe becomes an analogy of truth All reality is consciousness established through patterns of hierarchy and symmetry proceeding from God Action is known by equivalency and love is received in Creation
