South African context condemning apartheid is not enough To make a non racial democratic inclusive society viable and enduring much more is required of which creative and imaginative theological thinking is not the least Fundamental theological values and their implications for all the facets of society must be thought through not as an academic exercise but as a grass roots undertaking and the greatest challenge is to act in terms of this new understanding of society Bernard Lategan Some implications of the family concept in New Testament texts Democracy under Pressure Ursula van Beek,2022-10-31 This book identifies the main factors shaping the fortunes of democracy globally Why do some democracies in the same region and presumably subject to similar global influences remain stable while others regress This is the question guiding all the authors of this edited book In the search for answers they examine 16 democracies in paired and tripled comparisons in sub Saharan Africa North and Latin America East Asia Western and Central Europe along with two polar cases Insights from the perspectives of history political science economics and international relations are offered along with a sketch of possible future scenarios Combining approaches anchored in the analytical tradition with empirical case studies and given the broad range of topics this book is bound to be of interest not only to students and practitioners of

Susan Strange and the Future of Global Political Economy Randall Germain, 2016-04-28 This edited volume addresses the 2007-2009 financial crisis as the occasion to engage critically with the corpus of Susan Strange's work in order to consider what changes if any this crisis portends for the structural organization of the global political economy The contributors use Strange's rich conceptual framework to explore the financial crisis and its aftermath and reflect critically on the broader contributions which her work has made to the discipline of IPE The volume makes three valuable contributions for scholars and students First it raises the profile of Susan Strange a unique and powerful contributor to the field of IPE whose ideas matter to our current circumstance and can provide deep and enduring insights into important questions and issues Secondly each contributor to this volume combines her work and ideas with that of other traditions or individual theorists in ways that extend and/or deepen Strange's own efforts Finally this volume leaves us with a judicious optimism about the future of both IPE and the world as it actually is on the ground This book will be of interest to scholars and students who are interested in the dynamics shaping contemporary and future developments in the global political economy as well as those who are interested in the theoretical debates about how to study IPE

Comparative Area Studies Ariel I. Ahrām, Patrick Köllner, Rudra Sil, 2018-01-03 In the post World War II era the emergence of area studies marked a signal development in the social sciences As the social sciences evolved methodologically however many dismissed area studies as favoring narrow description over general theory Still area studies continues to play a key if unacknowledged role in bringing new data new theories and valuable policy relevant insights to social sciences In Comparative Area Studies three leading figures in the field have gathered an international group of scholars in a volume that promises to be a landmark in a resurgent field The book upholds two basic convictions that intensive regional research remains indispensable to the social sciences and that this research needs to employ comparative

referents from other regions to demonstrate its broader relevance Comparative Area Studies CAS combines the context specific insights from traditional area studies and the logic of cross and inter regional empirical research This first book devoted to CAS explores methodological rationales and illustrative applications to demonstrate how area based expertise can be fruitfully integrated with cutting edge comparative analytical frameworks
