

STEM STITCH

Also known as crotchet stitch, stem stitch and Dutch needlepoint stitch.

Stem stitch is one of the most frequently used needle stitches. It is quick and easy to work and follows intricate curves and linear designs well. Each stitch should be kept evenly sized and of an even size. A backwater needle line can be made by inserting the needle into the fabric at a right angle, instead of directly into the line to be covered by the stitches.

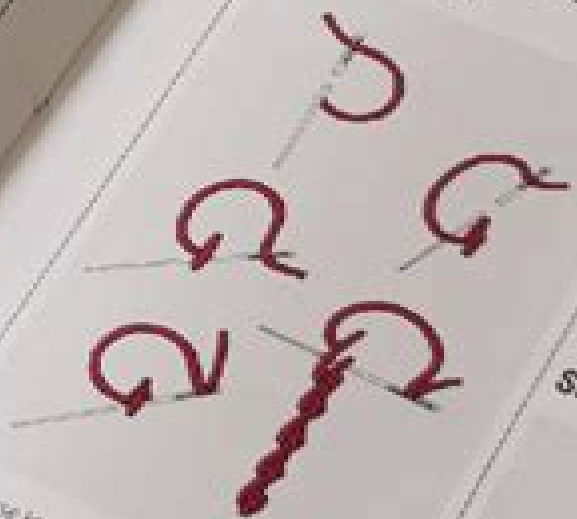

Work stem stitch upwards, with a simple forward and backward needle along the line as shown, always keeping the working thread in front of the needle. When the thread is kept in the back of the needle, the effect of the stitch is slightly different and it is then known as crotchet stitch.

WHIPPED STEM STITCH

Whipped stem stitch makes a stronger line than ordinary stem stitch (above). Use it when you want a heavy outline which will follow a complex design well. The stitch can be made more decorative if a contrasting colour and texture

PORTUGUESE KNOTTED STEM STITCH

Portuguese knotted stem stitch makes a knotted rope-like line which is accentuated when it is stitched in a thick, twisted thread such as perle cotton. This stitch is ideal for outlining designs where a heavy effect is required. Work this stitch using a needle with a sharp point and a thread with a strong twist.

or thread is used for the whipping element. The effect created by whipped stem stitch depends on the choice of whipping thread. Obtain a heavy, twisted thread in the same colour as the base thread or a contrasting colour. The stitching looks like the work of a flat, twisted cotton or a contrasting colour produced in ordinary stem stitch. First work a foundation row of ordinary stem stitch, then whip this line with a second thread without picking up any ground fabric. Use a short, even, loosely twisted, for the whipping thread to avoid pulling the stitches in the foundation line.

Outline stitch is a versatile product for outlining and for letter designs as it follows a line in single or multiple rows. The effect depends on the width of the thread, depending on the design. The stitch should be kept quite even size, and should be really straight. Work this stitch in the same way as split stitch, but always keep the working thread in front of the needle. The stitches will follow opposite directions to that of stem stitch.
