Diatom Identification Guide:

Modern Trends in Diatom Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for diagnostic tools e g environmental monitoring networks early warning systems to improve the management of water resources and decision making processes Describing the entire workflow of a bioindicator system from capture analysis and identification to the determination of quality indices this book provides insights into the current state of the art in automatic identification systems in microscopy

Identifying Marine Diatoms and Dinoflagellates Grethe R. Hasle, Erik E. Syvertsen, Karen A. Steidinger, Karl Tangen, Carmelo R. Tomas, 1996-01-25 Identifying Marine Diatoms and Dinoflagellates is the second identification manual created from the literature developed for the Advanced International Phytoplankton Course This version enlarged and modified from the earlier literature deals with the identification of marine diatoms and dinoflagellates The data and references presented here should allow the researcher to pursue the question of valid species and how they can be verified This volume comprises three chapters beginning with an introductory chapter discussing the subject s historical background The next chapter focuses on marine diatoms providing an introduction that describes their general characteristics life cycles morphology and terminology and classification It is followed by a discussion of genera represented in marine plankton a description of taxa and methodology The third and final chapter focuses on dinoflagellates beginning with an introduction that describes their general characteristics and eukaryotic unicells The discussion continues with terminology and morphology identification of species techniques for preparation of dinoflagellates for identification common dinoflagellate synonyms and an index of dinoflagellate taxa This book will be of interest to practitioners in the fields of biology zoology and environmental protection

Identifying Marine Phytoplankton Carmelo R. Tomas, 1997-08-12 Identifying Marine Phytoplankton is an accurate and authoritative guide to the identification of marine diatoms and dinoflagellates meant to be used with tools as simple as a light microscope The book compiles the latest taxonomic names an extensive bibliography referencing historical as well as up to date literature synthesis and criteria in one indispensable source Techniques for preparing samples and containing are included as well as hundreds of detailed helpful information Identifying Marine Phytoplankton is a combined paperback edition made available by popular demand of two influential books published earlier Marine Phytoplankton and Identifying Marine Diatoms and Dinoflagellates Contains hundreds of illustrations showing critical characteristics necessary for proper identification plus keys and other guides Provides up to date taxonomic revisions Includes species from around the world Updates synthesis of modern and historical literature
