Wiener, 1968 **From Hesiod to Saussure, From Hippocrates to Jevons: Volume I** Jens Høyrup, 2024-05-31 This book is the first of a three volume set introducing the history of scientific thought including social and human science The area covered in this volume is ancient Mesopotamia classical Antiquity and the Islamic Middle Ages Combining general descriptions with extensive excerpts from original sources in English translation it concentrates on ways of thinking and actual argumentation and not just on results and mistakes questions of validity are primarily dealt with in the perspective of the time of the writing not on that of the 21st century The work is of great interest to historians of science and culture students as well as seasoned workers but also for amateurs willing to invest the necessary serious efforts **Structure and the Whole** Patrick Sériot, 2014-04-01 This book identifies the Romantic notion of the whole as the fundamental epistemological source of the notion of structure in

Oxford Studies in Early Modern

Philosophy, Volume IX Donald Rutherford, 2020-01-02 Oxford Studies in Early Modern Philosophy is an annual series presenting a selection of the best current work in the history of early modern philosophy. It focuses on the seventeenth and eighteenth centuries, the extraordinary period of intellectual flourishing that begins very roughly with Descartes and his contemporaries and ends with Kant. It also publishes papers on thinkers or movements outside of that framework provided they are important in illuminating early modern thought. The articles in OSEMP will be of importance to specialists within the discipline but the editors also intend that they should appeal to a larger audience of philosophers, intellectual historians, and others who are interested in the development of modern thought.
