Chemical Vapour Deposition Precursors Processes And Applications:

Chemical Vapour Deposition Anthony C. Jones, Michael L. Hitchman, 2009 The book is one of the most comprehensive overviews ever written on the key aspects of chemical vapour deposition processes and it is more comprehensive technically detailed and up to date than other books on CVD The contributing authors are all practising CVD technologists and are leading international experts in the field of CVD It presents a logical and progressive overview of the various aspects of CVD processes Basic concepts such as the various types of CVD processes the design of CVD reactors reaction modelling and CVD precursor chemistry are covered in the first few Jacket

Chemical Vapour Deposition Xiu-Tian Yan, Yongdong Xu, 2010-03-23 Chemical Vapour Deposition An Integrated Engineering Design for Advanced Materials focuses on the application of this technology to engineering coatings and in particular to the manufacture of high performance materials such as fibre reinforced ceramic composite materials for structural applications at high temperatures This book aims to provide a thorough exploration of the design and applications of advanced materials and their manufacture in engineering From physical fundamentals and principles to optimization of processing parameters and other current practices this book is designed to guide readers through the development of both high performance materials and the design of CVD systems to manufacture such materials Chemical Vapour Deposition An Integrated Engineering Design for Advanced Materials introduces integrated design and manufacture of advanced materials to researchers industrial practitioners postgraduates and senior undergraduate students

Chemical vapour deposition of boron-carbon thin films from organoboron precursors Maiwulidan (Mewlude) Yimamu (Imam), 2016-01-13 Boron carbon BxC thin films enriched in 10B are potential neutron converting layers for 10B based solid state neutron detectors given the good neutron absorption cross section of 10B atoms in the thin film Chemical Vapour Deposition CVD of such films faces the challenge that the maximum temperature tolerated by the aluminium substrate is 660 C and low temperature CVD routes for BxC films are thus needed This thesis presents the use of two different organoboron precursors triethylboron $\text{B}(\text{C}_2\text{H}_5)_3$ TEB and trimethylboron $\text{B}(\text{CH}_3)_3$ TMB as single source precursors for CVD of BxC thin films The CVD behaviour of TEB in thermal CVD has been studied by both BxC thin film deposition and quantum chemical calculations of the gas phase chemistry at the corresponding CVD conditions The calculations predict that the gas phase reactions are dominated by hydride eliminations of C_2H_4 to yield BH_3 In addition a complementary bimolecular reaction path based on H_2 assisted C_2H_6 elimination to BH_3 is also present at lower temperatures in the presence of hydrogen molecules A temperature window of 600 1000 C for deposition of X ray amorphous BxC films with 2.5×4.5 is identified showing good film density $2.40 \text{--} 2.65 \text{ g cm}^{-3}$ which is close to the bulk density of crystalline B_4C 2.52 g cm^{-3} and high hardness 29 39 GPa The impurity level of H is lowered to 1 at % within the temperature window Plasma chemical vapour deposition has been studied using TMB as single source precursor in Ar plasma for investigating BxC thin film deposition at lower temperature than allowed by thermal CVD and further understanding of thin

film deposition process The effect of plasma power total pressure TMB and Ar gas flow on film composition and morphology are investigated The highest B C ratio of 1.9 is obtained at highest plasma power of 2400 W and TMB flow of 7 sccm The H content in the films seems constant at 15.5 at % The B C bond is dominant in the films with small amount of C C and B O bonds which are likely due to the formation of amorphous carbon and surface oxidation respectively The film density is determined as 2.16001 g cm³ and the internal compressive stresses are measured to be

Chemical Vapour Deposition (CVD) Kwang-Leong Choy, 2019-06-07 This book offers a timely and complete overview on chemical vapour deposition CVD and its variants for the processing of nanoparticles nanowires nanotubes nanocomposite coatings thin and thick films and composites Chapters discuss key aspects from processing material structure and properties to practical use cost considerations versatility and sustainability The author presents a comprehensive overview of CVD and its potential in producing high performance cost effective nanomaterials and thin and thick films Features Provides an up to date introduction to CVD technology for the fabrication of nanomaterials nanostructured films and composite coatings Discusses processing structure functionalization properties and use in clean energy engineering and biomedical grand challenges Covers thin and thick films and composites Compares CVD with other processing techniques in terms of structure properties cost versatility and sustainability Kwang Leong Choy is the Director of the UCL Centre for Materials Discovery and Professor of Materials Discovery in the Institute for Materials Discovery at the University College London She earned her D Phil from the University of Oxford and is the recipient of numerous honors including the Hetherington Prize Oxford Metallurgical Society Award and Grunfeld Medal and Prize from the Institute of Materials UK She is an elected fellow of the Institute of Materials Minerals and Mining and the Royal Society of Chemistry
