Write messages with invisible ink and then use a chemical reaction to reveal them. Investigate metals and salts in electrochemical experiments using a 9-volt battery (not included). Learn how to use common lab tools such as test tubes, pipettes, measuring devices, and safety goggles. See for yourself how chemistry goes far beyond textbooks and laboratories to explain occurrences that happen around us every day. The full-color experiment manual gives step-by-step illustrated instructions for setting up and performing each experiment, and then clear explanations of what happened and why.
