Catastrophe An Investigation Into The Origins Of Modern Civilization:

Catastrophe David Keys, 2000-10-02 It was a catastrophe without precedent in recorded history for months on end starting in A D 535 a strange dusky haze robbed much of the earth of normal sunlight Crops failed in Asia and the Middle East as global weather patterns radically altered Bubonic plague exploding out of Africa wiped out entire populations in Europe Flood and drought brought ancient cultures to the brink of collapse In a matter of decades the old order died and a new world essentially the modern world as we know it today began to emerge In this fascinating groundbreaking totally accessible book archaeological journalist David Keys dramatically reconstructs the global chain of revolutions that began in the catastrophe of A D 535 then offers a definitive explanation of how and why this cataclysm occurred on that momentous day centuries ago The Roman Empire the greatest power in Europe and the Middle East for centuries lost half its territory in the century following the catastrophe During the exact same period the ancient southern Chinese state weakened by economic turmoil succumbed to invaders from the north and a single unified China was born Meanwhile as restless tribes swept down from the central Asian steppes a new religion known as Islam spread through the Middle East As Keys demonstrates with compelling originality and authoritative research these were not isolated upheavals but linked events arising from the same cause and rippling around the world like an enormous tidal wave Keys s narrative circles the globe as he identifies the eerie fallout from the months of darkness unprecedented drought in Central America a strange yellow dust drifting like snow over eastern Asia prolonged famine and the hideous pandemic of the bubonic plague With a superb command of ancient literatures and historical records Keys makes hitherto unrecognized connections between the wasteland that overspread the British countryside and the fall of the great pyramid building Teotihuacan civilization in Mexico between a little known Jewish empire in Eastern Europe and the rise of the Japanese nation state between storms in France and pestilence in Ireland In the book s final chapters Keys delves into the mystery at the heart of this global catastrophe Why did it happen The answer at once surprising and definitive holds chilling implications for our own precarious geopolitical future Wide ranging in its scholarship written with flair and passion filled with original insights Catastrophe is a superb synthesis of history science and cultural interpretation
