Chemical Process Technology Jacob A Moulijn:

Chemical Process Technology Jacob A. Moulijn, Michiel Makkee, Annelies E. van Diepen, 2013-03-21 With a focus on actual industrial processes e.g. the production of light alkenes, synthesis gas, fine chemicals, polyethylene, it encourages the reader to think out of the box and invent and develop novel unit operations and processes. Reflecting today's emphasis on sustainability, this edition contains new coverage of biomass as an alternative to fossil fuels and process intensification. The second edition includes new chapters on Process Intensification and Processes for the Conversion of Biomass. Updated and expanded chapters throughout with 35% new material overall. Text boxes containing case studies and examples from various different industries e.g. synthesis loop designs, Sasol I Plant, Kaminsky catalysts, production of Ibuprofen, click chemistry, ammonia synthesis, fluid catalytic cracking. Questions throughout to stimulate debate and keep students awake. Richly illustrated chapters with improved figures and flow diagrams. **Chemical Process Technology Second Edition** is a comprehensive introduction linking the fundamental theory and concepts to the applied nature of the subject. It will be invaluable to students of chemical engineering, biotechnology and industrial chemistry as well as practising chemical engineers. From reviews of the first edition: The authors have blended process technology, chemistry and thermodynamics in an elegant manner. Overall, this is a welcome addition to books on chemical technology. The Chemist. Impressively wide ranging and comprehensive, an excellent textbook for students with a combination of fundamental knowledge and technology. *Chemistry in Britain* now *Chemistry World*. **Chemical Process Technology** Jacob A. Moulijn, Michiel Makkee, Annelies E. van Diepen, 2001-04-06 **Chemical Process Technology** is a comprehensive introduction examining both the fundamental concepts and applied nature of this subject. Modern process development relies on a knowledge of many different disciplines and an application and integration of this knowledge. The book provides an essential bridge between the chemical sciences and the chemical industry. It enables the reader to integrate fundamental knowledge of the basic disciplines to understand the most important chemical processes and to apply this knowledge and understanding to industrial processes. The text examines both large scale and small scale chemical and biotechnology industries and brings to life the concepts that form the basis of the process industry. Starting with a general look at the industry, subsequent chapters examine different processes in greater detail. Emphasis is placed on chemical reactions and the reactor, both at the heart of each process, but coverage also includes feed pre-treatment and product separation. **Key Features:** A comprehensive and balanced introduction providing an essential link between chemistry and the chemical industry. Includes problems with their solutions to encourage a fuller understanding of the project. Many examples and case studies taken from a variety of modern industries. Richly illustrated chapters with many clearly developed flow diagrams and numerous figures. **Chemical Process Technology** Jacob A. Chemical Reaction Engineering and Reactor Technology Tapio O. Salmi, Jyri-Pekka Mikkola, Johan P. Warna, 2011-07-01 The role of the chemical reactor is crucial for the industrial conversion of raw materials into products and numerous factors must be considered when selecting an appropriate and efficient chemical reactor Chemical Reaction Engineering and Reactor Technology defines the qualitative aspects that affect the selection of an industrial chemical reactor and couples various reactor models to case specific kinetic expressions for chemical processes Offering a systematic development of the chemical reaction engineering concept this volume explores Essential stoichiometric kinetic and thermodynamic terms needed in the analysis of chemical reactors Homogeneous and heterogeneous reactors Residence time distributions and non ideal flow conditions in industrial reactors Solutions of algebraic and ordinary differential equation systems Gas and liquid phase diffusion coefficients and gas film coefficients Correlations for gas liquid systems Solubilities of gases in liquids Guidelines for laboratory reactors and the estimation of kinetic parameters The authors pay special attention to the exact formulations and derivations of mass energy balances and their numerical solutions Richly illustrated and containing exercises and solutions covering a number of processes from oil refining to the development of specialty and fine chemicals the text

provides a clear understanding of chemical reactor analysis and design **Renewable Gas** Jo Abbess,2016-04-29 The author looks at the prospects for a transition from natural gas to low carbon gas which could take several decades and at how this will depend on the evolution of the fossil fuel industry She investigates the technologies and energy systems for making the best use of renewable gas resources Chemical Process Performance Evaluation Ali Cinar,Ahmet Palazoglu,Ferhan Kayihan,2007-01-11 The latest advances in process monitoring data analysis and control systems are increasingly useful for maintaining the safety flexibility and environmental compliance of industrial manufacturing operations Focusing on continuous multivariate processes Chemical Process Performance Evaluation introduces statistical methods and modeling te **Catalysis for Clean Energy and Environmental Sustainability** K. K. Pant,Sanjay Kumar Gupta,Ejaz Ahmad,2021-04-01 This book is part of a two volume work that offers a unique blend of information on realistic evaluations of catalyst based synthesis processes using green chemistry principles and the environmental sustainability applications of such processes for biomass conversion refining and petrochemical production The volumes provide a comprehensive resource of state of the art technologies and green chemistry methodologies from researchers academics and chemical and manufacturing industrial scientists The work will be of interest to professors researchers and practitioners in clean energy catalysis green chemistry chemical engineering and manufacturing and environmental sustainability This volume focuses on catalyst synthesis and green chemistry applications for petrochemical and refining processes While most books on the subject focus on catalyst use for conventional crude fuel oriented refineries this book emphasizes recent transitions to petrochemical refineries with the goal of evaluating how green chemistry applications can produce clean energy through petrochemical industrial means The majority of the chapters are contributed by industrial researchers and technicians and address various petrochemical processes including hydrotreating hydrocracking flue gas treatment and isomerization catalysts **Integrated Chemical Processes** Kai Sundmacher,Achim Kienle,Andreas Seidel-Morgenstern,2006-03-06 This is the first book dedicated to the entire field of integrated chemical processes covering process design analysis operation and control of these processes Both the editors and authors are internationally recognized experts from different fields in industry and academia and their contributions describe all aspects of intelligent integrations of chemical reactions and physical unit operations such as heat exchange separational operations and mechanical unit operations As a unique feature the book also introduces new concepts for treating different integration concepts on a generalized basis Of great value to a broad audience of researchers and engineers from industry and academia The Chemistry and Technology of Petroleum James G. Speight,2006-10-31 Refineries must not only adapt to evolving environmental regulations for cleaner product specifications and processing but also find ways to meet the increasing demand for petroleum products particularly for liquid fuels and petrochemical feedstocks The Chemistry and Technology of Petroleum Fourth Edition offers a 21st century perspective

Yeah, reviewing a books **Chemical Process Technology Jacob A Moulijn** could ensue your close connections listings. This is just one of the solutions for you to be successful. As understood, achievement does not recommend that you have astounding points.
