Damages in EU Public Procurement Law Hanna Schebesta, 2015-12-16 The book surveys the enforcement of EU law through the lens of damages claims for violations of EU public procurement rules The first part clarifies the requirements on damages claims under both public procurement and general EU law notably the public procurement remedies directives and doctrines such as procedural autonomy effective judicial protection and Member State liability The second part focuses on comparative law covering England France Germany and the Netherlands and provides an overview of national regulation and case law of damages litigation in the area of public procurement A third part discusses the constitutive and quantification criteria of the damages remedy from a comparative and EU law perspective It explores the lost chance which functionally emerges as a compromise capable of mitigating the typically problematic nature of causation and uncertainty in public procurement constellations The book concludes with a proposal for legislative intervention regarding damages in public procurement

**Public Procurement and the EU Competition Rules** Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement
