Challenges at the Bank for International Settlements Elmar B. Koch, 2007-10-20 For a number of reasons I am pleased that Elmar has asked me to write a foreword to this volume which assembles together a number of pieces that he wrote over the course of the decade between 1997 and 2007 The first reason is that it gives me the opportunity to thank him for the work he has carried out so conscientiously and ably in his role as an economist working for

the BIS I would however be remiss if I did not also thank him for his earlier efforts contributing in particular to the statistical output of the MED and also the broader contribution he made as president of the Sports Club from 2004 to 2007 A second reason for being pleased is that the research contained in this volume was drawn from the period when I was chief of the MED and very much involved in discussions of the portant issues to which these papers are directed Time goes fast when one is busy and it is all too easy to forget what was yesterday s central ques on This volume constitutes a kind of reintroduction to old friends and that is always a pleasure The papers in this volume are grouped into four time periods during each of which Elmar had been given different responsibilities The in resting point is that taken together they imply an interest in essentially all the important topics of interest to the BIS

The Regulation of Megabanks Katarzyna Parchimowicz,2022-11-22 Global systemically important banks G SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on

both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws Innovative Approach for the Development of Sustainable Settlements in East Africa Oscar Eugenio Bellini,Andrea Campioli,Claudio Del Pero,Cinzia M.L. Talamo,Davide Chiaroni,Stefano Guidarini,Camillo Magni,2022-11-19 This book deals with sustainable affordable housing in developing countries providing the main results of the BECOMe research project of the Politecnico di Milano Sustainable affordable housing in developing countries is increasingly important for African and international stakeholders with massive urbanization processes involving many countries consuming large territories and natural resources minus any strategy of sustainability and social equality and without consideration of the long term effects on the environment and subsequent generations While the issue of affordable housing requires approaches adapted to the many specific African contexts the case of Somalia seems representative of a fragile context characterized by the uncertainty of the social political and economic situations and the lack of common shared legislative references and strategies The book aims to provide knowledge and propose a methodological framework developed from this particular situation that can serve as a template On the basis of this main objective the book deals with approaches and problems related to the creation of sustainable housing ecosystems activating and boosting local enterprises and stimulating foreign investors to revamp the national AEC sector and related manufacturing industries models for modular settlements and business models and assessment methodologies useful for evaluating a set of appropriate technological solutions Chapters 03 and 07 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) Payment Systems David B.
