City Of Capital Politics And Markets In The English Financial Revolution:

City of Capital Bruce G. Carruthers, 1999-11-29 While many have examined how economic interests motivate political action Bruce Carruthers explores the reverse relationship by focusing on how political interests shape a market He sets his inquiry within the context of late Stuart England when an active stock market emerged and when Whig and Tory parties vied for control of a newly empowered Parliament Carruthers examines the institutional linkage between politics and the market that consisted of three joint stock companies the Bank of England the East India Company and the South Sea Company which all loaned large sums to the government and whose shares dominated trading on the stock market Through innovative research that connects the voting behavior of individuals in parliamentary elections with their economic behavior in the stock market Carruthers demonstrates that party conflict figured prominently during the company foundings as Whigs and Tories tried to dominate company directorships For them the national debt was as much a political as a fiscal instrument In 1712 the Bank was largely controlled by the Whigs and the South Sea Company by the Tories The two parties competed however for control of the East India Company and so Whigs tended to trade shares only with Whigs and Tories with Tories Probing such connections between politics and markets at both institutional and individual levels Carruthers ultimately argues that competitive markets are not inherently apolitical spheres guided by economic interest but rather ongoing creations of social actors pursuing multiple goals

Institutions, Partisanship and Credibility in Global Financial Markets Hye Jee Cho,2017-07-28 Increasingly integrated global financial markets have been shaken by a series of severe shocks in recent decades from Mexico s Tequila crisis to the upheavals in the Eurozone These crises have demonstrated that signs of uncertain local economic and political conditions can result in market fluctuations which in turn cause economic social and political instability Such instability is particularly severe for developing countries that rely heavily on international financial markets for their financial needs Building credibility in these markets is therefore important for national governments who wish to prevent market panic and capital flight and ultimately to achieve stable economic growth Earlier studies have argued that institutional arrangements that constrain governments and commit them to protecting private property rights and market friendly policies can send a strong positive signal to the markets about a given country s sovereign credibility This book argues however that the market perception of such credibility building institutions is significantly contingent on which party governs the country Formal institutions confer significant credibility building effects on left wing governments whereas less or no significant effects are enjoyed by right wing governments And beyond that any significant changes in a country s institutional landscape such as a breakdown of democracy or joining an international organization that can influence domestic politics have particularly strong impact on the credibility of left wing governments This argument is supported by a quantitative analysis of sovereign credit ratings data collected from around 90 developing countries from 1980 to 2007 by case studies from South Asia Eastern Europe and Latin America and by face to face interviews with 24 financial market experts based in Hong Kong Seoul and Paris

Women and Their Money 1700-1950 Anne Laurence,Josephine Maltby,Janette Rutterford,2008-11-20 This book examines women s financial activity from the early days of the stock market in eighteenth century England and the South Sea Bubble to the mid twentieth century The essays demonstrate how many women managed their own finances despite legal and social restrictions and show that women were neither helpless incompetent and risk averse nor were they unduly cautious and conservative Rather many women learnt about money and made themselves effective and engaged managers of the funds at their disposal The essays focus on Britain from eighteenth century London to the expansion of British financial markets of the nineteenth century with comparative essays dealing with the US Italy Sweden and Japan Hitherto writing about women and money has been restricted to their management of household finances or their activities as small business women This book examines the clear evidence of women s active

engagement in financial matters much neglected in historical literature especially women's management of capital

The City of London and Social Democracy Aled Rhys Davies, 2017 The City of London and Social Democracy evaluates the changing relationship between the United Kingdom financial sector the City of London and the post war social democratic State The key argument made in Aled Davies's study is that changes to the British financial system during the 1960s and 1970s undermined a number of the key components of social democratic economic policy practised by the post war British State The institutionalization of investment in pension and insurance funds the fragmentation of an oligopolistic domestic banking system the emergence of an unregulated international capital market centred on London the breakdown of the Bretton Woods international monetary system and the popularization of a City centric anti industrial conception of Britain's economic identity all served to disrupt and undermine the social democratic economic strategy which had attempted to develop and maintain Britain's international competitiveness as an industrial economy since the Second World War These findings assert the need to place the Thatcher government's subsequent economic policy revolution in which a liberal market approach accelerated deindustrialization and saw the rapid expansion of the nation's international financial service industry within a broader material and institutional context previously underappreciated by historians

Indian Ink Miles Ogborn, 2008-11-15 A commercial company established in 1600 to monopolize trade between England and the Far East the East India Company grew to govern an Indian empire Exploring the relationship between power and knowledge in European engagement with Asia Indian Ink examines the Company at work and reveals how writing and print shaped authority on a global scale in the seventeenth and eighteenth centuries Tracing the history of the Company from its first tentative trading voyages in the early seventeenth century to the foundation of an empire in Bengal in the late eighteenth century Miles Ogborn takes readers into the scriptoria ships offices print shops coffeehouses and palaces to investigate the forms of writing needed to exert power and extract profit in the mercantile and imperial worlds Interpreting the making and use of a variety of forms of writing in script and print Ogborn argues that material and political circumstances always undermined attempts at domination through the power of the written word Navigating the juncture of imperial history and the history of the book Indian Ink uncovers the intellectual and political legacies of early modern trade and empire and charts a new understanding of the geography of print culture

Animal Companions Ingrid H. Tague, 2015-06-17 Animal Companions explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates While Europeans kept pets long before the eighteenth century many believed that doing so was at best frivolous and at worst downright dangerous Ingrid Tague argues that for Britons of the eighteenth century pets offered a unique way to articulate what it meant to be human and what society ought to look like With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras England became the wealthiest nation in Europe with a new understanding of religion science and non European cultures and unprecedented

access to consumer goods of all kinds These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human animal relationships Drawing on a broad array of sources including natural histories periodicals visual and material culture and the testimony of pet owners themselves *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain

Endangered Neutrality Ubaldo Morozzi, 2024-05-14

Analysing a struggle for neutrality amid a rapidly changing European scene this book illustrates how the small state of Tuscany cunningly managed to preserve its sovereignty and independence during a dangerous diplomatic dispute with England *Endangered Neutrality* follows the actions of William Plowman 1660 who sparked the dispute and those of two of the main characters of the story Iacopo Giraldi 1663 1738 Tuscan ambassador to England and Lambert Blackwell d 1727 English envoy to Tuscany Through these privileged points of view the reader is plunged into the highest levels of European politics and diplomacy of the period This book offers a radically new approach to the study of Tuscan history particularly in relation to the reign of Cosimo III de Medici It underlines the weakness of the concept of the small state showing how Tuscany managed openly to confront a much more powerful country such as England Tuscany built a system of neutrality which leveraging the economic importance of the Mediterranean trade routes and of the port of Livorno allowed the Grand Duchy to preserve its independence Analysis of the case also offers a unique perspective on the functioning of the Tuscan and English diplomatic corps assessing the impact of the Glorious Revolution on English diplomatic capabilities Special attention is devoted to the importance of symbolism in diplomatic practice and to the role of trade and public opinion in resolving international disputes
