Math Instruction for Students with Learning Difficulties Susan Perry Gurganus, 2021-11-29. This richly updated third edition of *Math Instruction for Students with Learning Difficulties* presents a research-based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK-12 teachers. Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics, this essential text addresses teacher and student attitudes towards mathematics as well as language issues, specific mathematics disabilities, prior experiences, and cognitive and metacognitive factors. Chapters on assessment and instruction precede strands that focus on critical concepts. Replete with suggestions for class activities and field extensions, the new edition features current research across topics and an innovative thread throughout chapters and strands: multi-tiered systems of support as they apply to mathematics instruction.

Low Attainers in Primary Mathematics Berinderjeet Kaur, Masura Ghani, 2011-10-22. *Low Attainers in Primary Mathematics* focuses on data from students in Singapore schools. It is widely acknowledged that students from Singapore do well in mathematics in international studies. This book provides readers with a glimpse of students from Singapore who are at the other end of the ability spectrum. The book is based on a study that explored the mathematics content knowledge of Primary 4 low attainers in mathematics, their behaviours, affects, and home backgrounds and learning experiences. Based on the findings of the study, the book has recommendations for teachers of low attainers in primary mathematics. This book serves as a must-have resource for teachers and graduate students in Singapore who are working with or studying low attainers in primary mathematics. It also makes a worthy contribution towards literature on low attainers in the field of mathematics education.

Diversity in Mathematics Education Alan Bishop, Hazel Tan, Tasos N. Barkatsas, 2014-09-20. This book presents a research focus on diversity and inclusivity in mathematics education. The challenge of diversity, largely in terms of student profiles or contextual features, is endemic in mathematics education and is often argued to require differentiation as a response. Typically, different curricula, text materials, task structures, or pedagogies are favoured responses, but huge differences in achievement still result. If we in mathematics education seek to challenge that status quo, more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education. The book is

written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore Geometry Basics, Grades 5 - 8 Schyrlet Cameron, Carolyn Craig, 2016-01-04 Geometry Basics for grades 5 to 8 targets the basic geometry concepts students need to understand and perform operations involved in higher level math In this standards based series students are given practice with lines angles circles perimeter area volume two dimensional figures and three dimensional figures Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle and upper grade classrooms Designed by leading educators this product line covers a range of subjects including math science language arts social studies history government fine arts and character **Supporting Education □ The Teaching Assistant's Handbook** Karen Kearns, 2012-05-07 Supporting Education The Teaching Assistant s Handbook provides the essential information needed to complete the Certificate III in Education Support in the Community Services Training Package This resource provides Teaching Assistants within overview of child development and how children learn as well as an introduction to the key learning areas for primary school students Links to a wide range of online resources and information are also included along with strategies for working with students and teachers
