Weekly Question

How do dolphins sleep without drowning?

Dolphins are mammals, just like we are. Mammals eat, drink in certain ways. Both dolphins and humans breathe air and need regular sleep. Their babies are born alive instead of hatching from eggs. Dolphins and humans both have a backbone. However, dolphins do not have a nose like we do. And, instead of four legs, they have flippers and a tail.

Weekly Question

How do dolphins sleep without drowning?

Most animals that breathe air live on land. But because dolphins live in water, they have special adaptations that land mammals do not have. A dolphin breathes through a **blowhole** on top of its head. When a dolphin swims to the surface, it uses strong muscles to open its blowhole.
