Digital Sensations Space Identity And Embodiment In Virtual Reality:

Digital Sensations Ken Hillis, 1999 Virtual reality is a technological reproduction of the process of perceiving the real yet that process is filtered through the social realities and embedded cultural assumptions about human bodies and space held by the technology's creators *Digital Sensations* looks closely at how the lived world is affected by representational forms generated by communication technologies especially digital and optical virtual technologies Through critical histories of the technologies of vision light space and embodiment Ken Hillis traces the often contradictory intellectual and metaphysical impulses behind the Western transcendental wish to achieve an ever more perfect copy of the real He advocates that current and proposed virtual technologies reflect a Western desire to escape the body Because virtual technologies are new these histories also address unintended and underconsidered consequences flowing from their rapid dissemination such as commodification and the alienation of new forms of surveillance Book cover

Human Migration to Space Elizabeth Song Lockard, 2014-05-13 Human migration to space will be the most profound catalyst for evolution in the history of humankind yet this has had little impact on determining our strategies for this next phase of exploration Habitation in space will require extensive technological interfaces between humans and their alien surroundings and how they are deployed will critically inform the processes of adaptation As humans begin to spend longer durations in space eventually establishing permanent outposts on other planets the scope of technological design considerations must expand beyond the meager requirements for survival to include issues not only of comfort and well being but also of engagement and negotiation with the new planetary environment that will be crucial to our longevity beyond Earth Approaching this question from an interdisciplinary approach this dissertation explores how the impact of interior space architecture can meet both the physical and psychological needs of future space colonists and set the stage for humankind to thrive and grow while setting down new roots beyond Earth

Spaces of Care Loraine Gelsthorpe, Perveez Mody, Brian Sloan, 2020-04-16 The collection examines the ways in which the emerging interdisciplinary study of care provokes a reassessment of the connections and disjuncture between care and governance ethics and public personal and professional identities Evolving from a project coordinated by the Cambridge Socio Legal Group *Spaces of Care* brings together leading international scholars to articulate what we may consider to be a useful analytic of care Lawyers anthropologists sociologists and criminologists reflect on specific aspects of conceptualising caring relations in spaces These spaces include communities of care and abandonment self care and kinship care spaces as gaps in care the meanings of marketised care and the ways in which care is constructed and constrained in different ways in venues such as homes prisons workplaces and virtual spaces Common themes include temporality historical specificity and the dynamics of care across time and place subjectivity including different experiences of care the economies of care including the commodification of care public and private manifestations of care privatised care disruptions of care which generate

vulnerabilities with regard to continuities of care eligibility those deemed to be deserving and undeserving of care relationalities of care collective and individual agency in caring relations kinship care and technologies and imaginaries of care as in new notions of care forged by those in online virtual worlds such as Second Life **Digital Gameplay** Nate Garrelts, 2014-09-17 In recent years computer technology has permeated all aspects of life not just work and education but also leisure time Increasingly digital games are the way we play This volume addresses the world of digital games with special emphasis on the role and input of the gamer In fifteen essays the contributors discuss the various ways the game player interacts with the game The first half of the book considers the physical and mental aspects of digital game play The second section concentrates on other factors that influence play Essays cover the full range of digital gaming including computer and video games Topics include several detailed investigations of particular often controversial games such as Grand Theft Auto Vice City as well as a consideration of the ways in which game playing crosses socioeconomic age gender and racial lines The concluding essays discuss scholars perceptions of digital media and efforts to frame them Instructors considering this book for use in a course may request an examination copy here *North of Empire* Jody

Body/State Dr Angus Cameron, Dr Jen Dickinson, Dr Nicola Smith, 2013-03-28 Body State brings together original essays addressing various aspects of the evolving interaction between bodies and states While each essay has different empirical and or theoretical focus authors consider a number of overlapping themes to appreciate the state s engagement with and concern about bodies Divided into five parts the first part Bodies Modified and Divided considers how the production regulation policing and maintenance of borders physical social sexual political religious etc are used to enable or constrain the physical re shaping of the body Part two Capital Bodies extends the state s concern with the flows of bodies that make up the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets Part three Deviance and Resistance examines both how states seek to discipline non normal bodies and appreciates the capacity of changes in the socio cultural meaning and nature of bodies to resist and or escape states Part four Sovereignty and Surveillance develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself Finally Part five The Body Virtual examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself A varied collection of essays that address important and complex topics in a readable and creative way **Living in Digital Worlds** Naomi Jacobs, Rachel Cooper, 2018-01-29 Living in Digital Worlds investigates the relationship between human society and technology as our private and particularly our public lives are increasingly undertaken in spaces that are inherently digital digital public spaces The book unpicks why digital technology is such an inextricable part of modern society

first by examining the historical relationship between technological development and the early progression of human sociality This is then followed by an examination of the ways in which modern life is currently being impacted by the expansion of digital information and devices into multiple aspects of our lives including focuses on privacy bias and ownership in digital spaces Finally it explores potential future developments and their implications and proposes that it is crucial to consider the design of technology and systems in order to support a positive and beneficial direction of change Each chapter includes case studies primarily drawn from The Creative Exchange a fiveyear programme which ran from 2012 to 2016 to explore the notion of the digital public space through collaborative cross sector research

Psychoanalysis in the Technoculture Era Alessandra Lemma, Luigi Caparrotta, 2013-07-18 Alessandra Lemma Winner of the Levy Goldfarb Award for Child Psychoanalysis By now the internet and other forms of virtual communication have been in place for at least twenty years However surprisingly little has been written about the use of new technologies in the psychoanalytical literature As such Psychoanalysis in the Technoculture Era is a timely exposition on the subject of both virtual and analytic space Bringing together the work of several psychoanalysts the Editors Alessandra Lemma and Luigi Caparrotta illustrate how new technologies have become an integral part of our everyday lives and how they have silently and subtly permeated the psychoanalytic setting The contributors explore how new technologies have affected psychoanalytic practice and discuss the advantages and disadvantages of its use Psychoanalysis in the Technoculture Era unravels some of the meanings of virtual world terms and opens this field to greater scrutiny stimulating and promoting discussion about new technologies in psychoanalytic practice This book will be of interest to the psychoanalytic community including psychotherapy professionals psychoanalysts post graduate graduate and undergraduate students

Bodies in Code Mark B. N. Hansen, 2012-10-02 Bodies in Code explores how our bodies experience and adapt to digital environments Cyberculture theorists have tended to overlook biological reality when talking about virtual reality and Mark B N Hansen s book shows what they ve been missing Cyberspace is anchored in the body he argues and it s the body not high tech computer graphics that allows a person to feel like they are really moving through virtual reality Of course these virtual experiences are also profoundly affecting our very understanding of what it means to live as embodied beings Hansen draws upon recent work in visual culture cognitive science and new media studies as well as examples of computer graphics websites and new media art to show how our bodies are in some ways already becoming virtual
