Deferring Democracy Catharin E. Dalpino, 2011-01-01 The democratic surge in the past twenty years has led many Americans to assume that all societies are or should be making progress toward becoming practicing democracies Many in the United States approach countries such as China Iran and Vietnam with impatience and bewilderment These seemingly intransigent holdouts are the subject of intense policy debates not in the least because they also play important roles in U S security and economic policy This book takes a fresh look at the prospects for political change in these countries and argues that immediate opportunities exist to advance political liberalization with the possibility that democratization will follow in the mid to long term But to encourage these trends the United States must de emphasize short term human rights and democracy strategies to focus on more subtle attitudinal and institutional changes in both state and society and develop new policy measures to enlarge political space

What the West is Getting Wrong about the Middle East Ömer Taspınar, 2020-09-17 The West s actions in the Middle East are based on a fundamental misunderstanding political Islam is repeatedly assumed to be the main cause of conflict and unrest in the region The idea that we can decipher Jihadist radicalization or problems in the Middle East simply by reading the Qur an has now become symptomatic of our age This dangerous over simplification and the West s obsession with Islam dominates media and policy analysis ultimately skewing intervention and preventing long term solutions and stability in the region mer Taspınar who has 20 years research and policymaking experience explains here what is really going on in the Middle East The book is based on three of the most pressing cases currently under the spotlight the role of Erdogan and the unrest in Turkey the sectarian clashes in Iraq Syria Yemen and Lebanon and the existence of the so called Islamic State Islam is often seen as the root cause of the challenge associated with these cases But by unpacking the real issues such as entrenched authoritarianism vast energy resources excessive defense spending and the youth bulge the book demystifies what is happening and cites governance and nationalism as the main drivers of conflict The book shows the importance of treating the causes which are economic social and institutional rather than the symptom the continued and growing success of Islamist parties and jihadist

movements in assessing the Middle East In revealing exactly how Islamism is activated and by analyzing the structural challenges of the region this unique insider's account provides a map to understanding Middle Eastern wars and conflicts and the prospects for the future *Special Bibliography Series*, 1957 *Building Democratic Institutions* G. Shabbir Cheema, 2005 Annotation Bridges the gap between theoretical literature and the tools and practices needed to strengthen or rebuild democratic institutions and reform governance systems Through case studies and examples of good practices of governance Cheema assesses the conditions that make democracy work **Governance, Politics and the Environment** Maria Francesch-Huidobro, 2008-07-09 In the past two decades research on environmental issues in East and Southeast Asian countries has mainly focused on existing institutional mechanisms of environmental management the establishment of new environmental management structures the introduction of incentives to improve natural capital and foster environmental protection and the culture of environmental or green groups Virtually no rigorous research has been directed into the nature and significance of the existing relationship between government and civil society in individual country studies with specific reference to the environmental policy sector or into how this relationship may be evolving This book explores this connection in Singapore and what causes it to evolve through three case narratives Its rationale is to address this gap in the literature from a governance theory perspective that focuses on state adaptation to the external environment and new forms of coordination and collaboration between government and civil society to tackle new societal problems The application of the governance theory approach to specific case studies is itself a topic that deserves much greater study than what it has so far received **Exporting Press Freedom** Craig LaMay, 2017-07-12 International media assistance is a small but important form of international democracy promotion aid Media assistance boomed after the 1989 transitions in Central Europe but now flows to virtually all regions of the world Today the media assistance industry is focused on the problem of sustainability How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the consumer marketplace Many media in developing countries have been or are grant dependent When grants are exhausted or withdrawn media that were funded to further democratic consolidation typically wither and die Some become mere grant chasers Others abandon public service to the demands of market competition or political patronage As a result governmental and non governmental grant makers now emphasize the need for sustainability in considering grants in the media sector Many grant recipients have grown frustrated sometimes bitter and have sought to take a much more active role in the way assistance programs are put together Just how is sustainability to be achieved while also ensuring a public service editorial mission *Exporting Press Freedom* examines the history and practice of media assistance and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will It includes profiles of news and public affairs media in developing and democratizing countries and also of two non governmental organizations that have pioneered the use of low

interest loans in media assistance These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media Such approaches may be of use not only in the developing world but in the consolidated Western democracies as well where concern has grown about poor journalistic performance and its consequences f

Making Russia and Turkey Great Again? Norman A. Graham,Folke Lindahl,Timur Kocaoglu,2021-03-19 This study analyzes theoretically and empirically the background of the rise to power of Vladimir Putin in Russia and Recep Tayyip Erdogan in Turkey It situates this analysis in the contexts of the historical assessment of the fragility of liberal democracy and the persistence and growth of authoritarianism populism and dictatorship in many parts of the world The authors argue that the question whether Putin and Erdogan can make Russia and Turkey great again is hard to confirm personal ambition for power and wealth is certainly key to an understanding of both rulers They each squandered opportunities to build from free and fair democratic electoral legitimacy and economic progress The prospect for restored national greatness depends on how they can handle the economic and political challenges they now face and will continue to face in the near future in a climate of global pandemic and economic recession Both rulers so far have succeeded in maintaining and increasing their powers and influence in their respective regions but neither has made real contributions to regional stability and order Chaos seems to be growing and the EU and the U S thus far seem unable to provide coherent responses to mitigate the impact of their adventurism and disruption
