Defying The Crowd Defying The Crowd:

Defying the Crowd Robert J. Sternberg, Todd I. Lubart, 2002-01-15 World renowned psychologist Robert Sternberg presents a fresh and compelling picture of the creative process from the inception of an idea to its ultimate success With illuminating examples Sternberg reveals the paths we all can take to become more creative and shows how institutions can learn to foster creativity What is creative is new and often brings about positive change But what is new is also strange and what is strange can be scary even threatening which is why they don't want to hear it But they are unwise not to listen for the creative person with original ideas is the one who with support will advance and improve the milieu to the benefit of all from *Defying the Crowd*

The Nature of Human Creativity Robert J. Sternberg, James C. Theory Construction and Model-Building Skills James Jaccard, Jacob Jacoby, 2020-02-06 This book provides young scientists with tools to assist them in the practical aspects of theory construction We take an informal journey through the cognitive heuristics tricks of the trade and ways of thinking that we have found to be useful in developing theories essentially conceptualizations that can advance knowledge in the social sciences This book is intended to provide the instructor with a useful source for helping students come up with ideas for research and for fine tuning the resultant theories that emerge from such thinking An objective of this book is to move toward a needed balance in the emphases given to theory construction and theory testing

Handbook of Research Methods on Creativity Viktor Dörfler, Marc Stierand, 2020-07-31 This Handbook offers an insightful journey through the landscape of research methods used to study the phenomenon of creativity Offering a methodological panorama for the global community of creativity researchers contributors provide markers and waypoints to better orient scholars and encourage reflection on how one might produce exceptional research on the burgeoning field of creativity

Rethinking Creativity Robert W. Weisberg, 2020-09-10 Discover how creativity depends on inside the box thinking that's right not outside the box and a new perspective on creative thinking

New Directions in Aesthetics, Creativity and the Arts Paul Locher, Colin Martindale, Leonid Dorfman, 2020-02-10 The contributing authors to this book all pre eminent scholars in their

fields present their current thinking about the processes that underlie creativity and aesthetic experience. They discuss established theory and research and provide creative speculation on future problems for inquiry and new approaches to conceptualising and investigating these phenomena. The book contains many new findings and ideas never before published or new by virtue of the novel context in which they are incorporated. Thus the chapters present both new approaches to old problem and new ideas and approaches not yet explored by leading scholars in these fields. The first part of the book is devoted to understanding the nature of the perceptual cognitive and aesthetic processes that occur during encounters with visual art stimuli in everyday settings in museums and while watching films. Also discussed in Part I is how cultural and anthropological approaches to the study of aesthetic responses to art contribute to our understanding about the development of a culture's artistic canon and to cross cultural aesthetic universals. Part II presents new dimensions in the study of creativity. Two approaches to the development of a comprehensive theory of creativity are presented: Sternberg's Investment Theory of Creativity and a systems perspective of creativity based on a meta-individual world model. Also covered are the factors that contribute to cinematic creativity and a film's cinematic success and the complex nature of the creative processes and research approaches involved in the innovative product design necessitated by the introduction of electronics in consumer products. Part III deals with the application of concepts and models from cognitive psychology to the study of music, literary meaning and the visual arts. The contributors outline a model of the cognitive processes involved in real time listening to music, investigate what readers are doing when they read a literary text, describe what research shows about the transfer of learning from the arts to non arts cognition and discuss the kinds of thinking skills that emerge from the study of the visual arts by high school students. In Part IV the authors focus on the interactive contribution of observers' personalities and affect states to the creation and perception of art. The chapters include a discussion of the internal mechanisms by which personality expresses itself during the making of and the response to art, the relationship between emotion and cognition in aesthetics in terms of the interaction of top down and bottom up processes across the time course of an aesthetic episode, the affective processes that take place during pretend play and their impact on the development of creativity in children and the causes and consequences of listener's intense experiences while listening to music.
