Prevention of the Disease of Aging Katherine Blanchette, 2007-03 Blanchette documents how nutrients can prevent and treat disease without the need for prescription drugs and endless doctor visits She outlines common diseases of aging and treatment plans for those particular diseases Practical Life

Prevention of Chronic Diseases and Age-Related Disability Jean-Pierre Michel, 2018-10-30 This book explains how to promote and prolong healthy ageing which constitutes maintaining daily functioning and well being until the end of life In this context the editor of the book and the international team of authors all of whom are experts on the various aspects of ageing demonstrate the value of this new approach in clinical practice The systematic integration of a functional assessment if not a complete and comprehensive geriatric assessment is fundamental in daily clinical practice Identifying risk factors at midlife will help to promote health at any age Moreover randomized control trials are making it increasingly clear that interventions could help ageing and elderly adults enjoy their remaining years without disability Indeed wellbeing will also increase allowing elderly adults to stay independent until a very advanced age The book also shows how considerable societal benefits can be easily forecast when more lifetime is spent without disability followed by a dignified end of life This book will be of interest to all medical doctors general practitioners and organ specialists as well as geriatricians who want to have a complete overview of what healthy ageing means

David Baglietto-Vargas, Kristine Freude, Ines Moreno-Gonzalez, Carlos J. Rodriguez-Ortiz, 2022-03-14 **Western Diseases, Their Emergence and Prevention** Hubert Carey Trowell, Denis Parsons Burkitt, Denis P. Burkitt, 1981 In this major synthesis of cross cultural research 34 distinguished scientists study 25 common metabolic and degenerative diseases characteristic of all advanced Western nations and then examine their incidence in developing countries among both hunter gatherers and peasant agriculturalists Thus the authors provide a unique opportunity to compare epidemiological data reflecting modern modes of life with data influenced by habits and diets dating back 400 generations to the advent of agriculture and even 200 000 generations or more to the dawn of man The results confirm the view that diseases like hypertension lung cancer diverticular disease and appendicitis are maladaptations to environmental factors introduced since the Industrial Revolution They also demonstrate that such diseases become more prevalent when Western lifestyles are adopted in primitive societies Certain studies reveal a regression of disease incidence when exercise is increased and a diet high in starch and fiber low in fat and salt is resumed characteristics of a simpler way of life Western Diseases greatly broadens our perspective on some of the most vexing health problems in our society It will be an essential reference for epidemiologists nutritionists and gastroenterologists in particular
