Comparative Studies In Educational Policy Analysis Contemporary Research In Education:

Comparative Studies in Educational Policy Analysis Timothy Reagan, 2013-04-01 This book has a pedagogical goal in mind it is not a scholarly work so much as an applied text informed by scholarship and research The book's goal is to provide individuals who are teaching courses in comparative and international education educational administration educational policy and politics of education with a supplementary text that can be used to help their students develop skills in policy analysis evaluation and development As is explained in the book the problem that we face with respect to having students engage in hands on study of particular cases is that by focusing on real cases students are faced with either virtually unlimited data or insufficient data or indeed paradoxically with both problems In addition students come to such cases with all sorts of preconceptions that can cloud judgment in a host of ways By making use of fictitious case studies though we can carefully limit the amount of data with which students need to deal and we can also minimize the challenges presented by the baggage that students might bring with them about particular real nations

The SAGE Handbook of Comparative Studies in Education Larry E. Suter, Emma Smith, Brian D. Denman, 2019-05-27 Educational practices have rapidly changed in the last few decades especially in how exchanges of information and learning are delivered and processed Yet while the field of international comparative studies has grown there has not been an extensive study on the relationship between educational practices students and how practitioners are prepared and trained This handbook explores international educational practices and behaviours through new research and a review of existing research with chapters spread across six parts Part I Introduction to Research Practices in Comparative Studies of Education Part II Research Methods Part III Policy Transfer Research through International Comparisons Part IV Use of Student time in Formal and Informal Settings Part V School Practices from Early Childhood through Secondary School Part VI Conclusion Lessons from Large Scale Studies

International Studies in Educational Inequality, Theory and Policy Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization More and more populations both rich and poor depend on successful use of school and on gaining post school qualifications But access to high quality schooling success at school and chances of higher education all remain socially divided with implications for economic opportunities personal growth and civic and community development What causes these divisions in how education systems work Have decades of public investment brought about at least some improvements even if major gaps remain If not what are the barriers the social processes which have frustrated the efforts of government The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts from the wealthiest to some of the poorest nations on earth What have we learnt from the policy experience globally Do we know more today than yesterday about the origins of social inequality

Are our policies better framed better designed to tackle inequality And which way forward What does the evidence suggest in terms of future approaches and emphasis This work is published in three volumes which together form a 3 volume set

Research in Education ,1973 **The SAGE Handbook for Research in Education** Clifton F. Conrad,Ronald C. Serlin,2011-06-10 The SAGE Handbook for Research in Education Pursuing Ideas as the Keystone of Exemplary Inquiry edited by Clifton F Conrad and Ronald C Serlin stimulates and encourages students faculty and educational practitioners including individuals in Pre K 16 education government and the private sector who conduct applied and policy oriented educational research to place the pursuit of ideas at the epicenter of their research from framing meaningful problems to identifying and addressing key challenges to the reporting and dissemination of their findings As well as supporting readers to place the pursuit of ideas as the keystone of exemplary inquiry the Handbook draws on the perspectives of scholars representing diverse fields within the field of education from pre kindergarten to elementary and secondary school to higher education as well as qualitative quantitative and mixed methods approaches to inquiry The chapters are punctuated throughout by the voices of authors who wrestle with the formidable challenges of framing and conducting and reporting meaningful inquiry Resources in Education ,1998 New Practices of Comparison, Quantification and Expertise in Education Christina Elde Mølstad,Daniel Pettersson,2019-03-29 New Practices of Comparison Quantification and Expertise in Education discusses contemporary trends and activities related to comparisons and quantifications It aims to help scholars to conduct empirically based research on how comparisons and quantifications are instituted in practice at different levels in the educational system The book furthers discussions on policy by looking at the kinds of activities that comparisons and quantifications lead to at an international regional and national level Most of the book s chapters are based on empirical research conducted in different research projects The book thus brings all these projects together and discusses them as activities promoted by the reasoning of comparisons and quantifications New Practices of Comparison Quantification and Expertise in Education will be of great interest to academics researchers and post graduate students in the fields of comparative education curriculum research and policy studies It will also appeal to those in the fields of teacher education including student teachers *International Organizations and Higher Education Policy* Roberta Malee Bassett,Alma Maldonado-Maldonado,2010-04-15 Higher Education operates in an increasingly global context and yet the examination of what drives and moves the field has remained largely focused on domestic campus leaders national governments and institutional actors International Organizations and Higher Education Policy expands the analysis to include the global drivers behind higher education policy including a full array of influential organizations such as the World Bank UNESCO OECD WTO bilateral aid agencies and major private foundations The significance of these organizations is especially pronounced in the developing world where the expansion of higher education is happening in conjunction with the broadening influence of globalization International Organizations and Higher Education Policy critically analyses the impact

that these influential organizations have at different levels of policy development and implementation around the world It examines their role in higher education institutions examines the strength of these relationships and exposes both the positive and negative implications This edited volume is composed of scholars and members of these organizations from around the world They address How international organizations represent the interests of the developed world and subsequently have an impact on the developing world How these organizations drive and shape the global agenda for higher education How higher education as an international industry is subject to a myriad of influences from the international to the regional level What ethical issues emerge when international organizations intervene in national policy making processes

The Impact of HIV/AIDS on Education Worldwide Alexander W. Wiseman, Ryan N. Glover, 2012-11-29 Given the context and prevalence of HIV AIDS worldwide this volume presents information policy case studies and empirical research for use by educators policymakers and organizations about the relationship between HIV AIDS and education including how HIV AIDS has impacted education systems and the potential impact education has on HIV AIDS *Testing Regimes, Accountabilities and Education Policy* Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD s PISA and IEA s TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation s human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy
